SECTION I – INTRODUCTION

A. RISK FACTORS

1. STANDARD RISK FACTORS

   (i) Mutual Funds and securities investments are subject to market risks such as trading volumes, settlement risk, liquidity risk and default risk including the possible loss of principal and there is no assurance or guarantee that the objectives of the Scheme will be achieved.

   (ii) As the price / value / interest rates of the securities in which the scheme invests fluctuates, the value of your investment in the scheme may go up or down.

   (iii) Past performance of the Sponsor/AMC/Mutual Fund does not guarantee future performance of the scheme.

   (iv) Reliance Gold Savings Fund is only the name of the Scheme and does not in any manner indicate either the quality of the scheme or its future prospects and returns.

   (v) The Sponsor is not responsible or liable for any loss resulting from the operation of the Scheme beyond their initial contribution of Rs.1 lakh towards the setting up of the Mutual Fund and such other accretions and additions to the corpus.

   (vi) The present scheme is not a guaranteed or assured return scheme. The Mutual Fund is not guaranteeing or assuring any dividend.

   (vii) The Mutual Fund is also not assuring that it will make periodical Dividend distributions, though it has every intention of doing so. All Dividend distributions are subject to the availability of distributable surplus of the Scheme.

2. SCHEME SPECIFIC RISK FACTORS

   (i) Investors may please note that they will be bearing the expenses of the relevant fund of fund scheme in addition to the expenses of the underlying schemes in which the fund of fund scheme makes investment.

   (ii) The Scheme may invest predominantly in Reliance ETF Gold BeES of Reliance Mutual Fund. Hence the Scheme’s performance may depend upon the performance of the underlying mutual fund scheme. Any change in the investment policies or the fundamental attributes of the underlying scheme could affect the performance of the Scheme.

   (iii) The investors of the Scheme will bear dual recurring expenses and possibly dual loads, viz, those of the Scheme and those of the underlying Schemes. Hence the investor under the Scheme may receive lower pre-tax returns than what they could have received if they had invested directly in the underlying Schemes in the same proportions.

   (iv) The Portfolio disclosure of the Scheme will be limited to providing the particulars of the underlying schemes where the Scheme has invested and will not include the investments made by the underlying Schemes. However, as the scheme proposes to invest only in Reliance ETF Gold BeES, the underlying assets will by and large be physical gold.

   (v) The changes in asset allocation may result in higher transaction costs.

   (vi) The value (price) of gold may fluctuate for several reasons and all such fluctuations will result in changes in the NAV of units under the scheme.

   (vii) The factors that may effect the price of gold, among other things, include demand and supply for gold in India and in the global market, Indian and Foreign exchange rates, Interest rates, Inflation trends, trading in gold as commodity, legal restrictions on the movement/trade of gold that may be imposed by RBI, Government of India or countries that supply or purchase gold to/from India, trends and restrictions on import/export of golden jewellery in and out of India, etc.

   (viii) The fund assets are predominantly invested in Reliance ETF Gold BeES and valued at the market price of the said units on the principal exchange.

   (ix) The same may be at a variance to the underlying NAV of the fund, due to market expectations, demand supply of the units, etc. To that extent the performance of scheme shall be at variance with that of the underlying scheme/s.

   (x) The endevaour would always be to get cash on redemptions from the underlying fund. However, in case the underlying fund is unable to sell for any reason, and delivers physical gold, there could be delay in payment of redemptions proceeds pending such realization.

   (xi) The fund will subscribe according to the value equivalent to unit creation size as applicable for each of the underlying scheme. When subscriptions received are not adequate enough to invest in creation unit size, the subscriptions may be deployed in debt and money market instruments which will have a different return profile compared to gold returns profile.

   (xii) The liquidity of the Scheme’s investments may be inherently restricted by trading volumes, settlement periods and transfer procedures. In the event of an inordinately large number of redemption requests, or of a re-structuring of the Scheme’s investment portfolio, these periods may become significant.

   (xiii) Although, the objective of the Fund is to generate optimal returns, the objective may or may not be achieved.

   (xiv) The NAV of the scheme to the extent invested in Money market securities are likely to be affected by changes in the prevailing rates of interest and are likely to affect the value of the Scheme’s holdings and thus the value of the Scheme’s Units.

   (xv) While securities that are listed on the stock exchange carry lower liquidity risk, the ability to sell these investments is limited by the overall trading volume on the stock exchanges. Money market securities, while fairly liquid, lack a well-developed secondary market, which may restrict the selling ability of the Scheme and may lead to the Scheme incurring losses till the security is finally sold.

   (xvi) Investment decisions made by the AMC may not always be profitable, even though it is intended to generate capital appreciation and maximize the returns.
Additionally, the prices of gold may be affected by several factors such as global gold supply and demand, investors' expectations with Mutual funds and securities investments are subject to market risks and there is no assurance or guarantee that the objectives of

Market Risk

(xviii) Risk factors associated with repo transactions in corporate bonds -

In Repo transactions, also known as a repo or sale repurchase agreement, securities are sold with the seller agreeing to buy them back at later date. The repurchase price should be greater than the original sale price, the difference effectively representing interest. A repo is economically similar to a secured loan, with the buyer receiving corporate debt securities as collateral to protect against default. The Scheme may invest in repo of corporate debt securities which are subject to the following risks:

a. Counterparty Risk: This refers to the inability of the seller to meet the obligation to buy back securities at the contracted price. The Investment Manager will endeavor to manage counterparty risk by dealing only with counterparties having strong credit profiles assessed through in-house credit analysis or with entities regulated by SEBI/RBI/IRDA.

b. Collateral Risk: In the event of default by the repo counterparty, the schemes have recourse to the corporate debt securities. Collateral risk arises when the market value of the securities is inadequate to meet the repo obligations. This risk is mitigated by restricting participation in repo transactions only in AA and above rated money market and corporate debt securities. In addition, appropriate haircuts are applied on the market value of the underlying securities to adjust for the illiquidity and interest rate risk on the underlying instrument.

(xiv) Risk associated with investments in Reliance ETF Gold BeES

Market Risk

Mutual funds and securities investments are subject to market risks and there is no assurance or guarantee that the objectives of the Scheme will be achieved. The NAV of the Scheme will react to the prices of gold, Gold Related Instruments and stock market movements. The Unit holder could lose money over short periods due to fluctuation in the NAV of the Scheme in response to factors such as economic and political developments, changes in interest rates and perceived trends in stock prices market movements, and over longer periods during market downturns.

Additionally, the prices of gold may be affected by several factors such as global gold supply and demand, investors’ expectations with respect to the rate of inflation, currency exchange rates, interest rates, etc. Crises may motivate large-scale sales of gold, which could decrease the domestic price of gold.

Some of the key factors affecting gold prices are as follows:

Central banks' sale: Central banks across the world hold a part of their reserves in gold. The quantum of their sale in the market is one of the major determinants of gold prices. A higher supply than anticipated would lead to subdued gold prices and vice versa. Central banks buy gold to augment their existing reserves and to diversify from other asset classes. This acts as a support factor for gold prices.

Producer mining interest: Bringing new mines on-line is a time consuming and at times economically prohibitive process that adds years onto potential supply increases from mining production. On the other hand, lower production has a positive effect on gold prices. Conversely excessive production capacities would lead to a downward movement in gold prices as the supply goes up.

Macro-economic factors: A weakening dollar, high inflation, the massive US trade deficits all act in favor of gold prices. The global trend of rising interest rates also had a positive impact on gold prices. Gold being regarded as a physical asset would lose its luster in a deflationary environment as gold is used effectively as an inflation hedge.

Geo political issues: any uncertainty on the political front or any war-like situation always acts as a booster to gold prices. The prices start building up war premiums and hence such movements. Stable situations would typically mean stable gold prices.

Seasonal demand: Since the demand for Gold in India is closely tied to the production of jewellery pieces tend to increase during the times of year when the demand for jewellery is the greatest, the demand for metals tends to be strong a few months ahead of these festive seasons, especially Dussera, Diwali, Akshaya Trithya festival and summer wedding season in India. Christmas, Mothers Day, Valentine’s Day, are also major festive and shopping for Gold.

Change in duties & levies: The gold held by the Custodian of Reliance ETF Gold BeES may be subject to loss, damage, theft or restriction of access due to natural event or human actions. The Trustees may not have adequate sources of recovery if its gold is lost, damaged, stolen or destroyed and recovery may be limited, even in the event of fraud, to the market value of gold at the time the fraud is discovered.

The custodian will maintain adequate insurance for its bullion and custody business. The liability of the Custodian is limited under the agreement between the AMC and the Custodian which establish the Mutual Fund’s custody arrangements, or the custody agreements.

Market Trading Risks

Although the units of Reliance ETF Gold BeES are listed on the National Stock Exchange of India Limited, there can be no assurance that an active secondary market will develop or be maintained.

Lack of Market Liquidity

Trading in Reliance ETF Gold BeES on the Exchange may be halted because of market conditions or for reasons that in the view of the market authorities or SEBI, trading in Reliance ETF Gold BeES is not advisable. In addition, trading in Reliance ETF Gold BeES is subject to trading halts caused by extraordinary market volatility and pursuant to Stock Exchange(s) and SEBI “circuit filter” rules. There can be no assurance that the requirements of the market necessary to maintain the listing of Reliance ETF Gold BeES will continue to be met or will remain unchanged. Reliance ETF Gold BeES may suffer liquidity risk from domestic as well as international market.
The Unit Holders may note that even though this is an open-ended scheme, the Scheme would ordinarily repurchase Units in Creation Redemption. Risk

The Trustee, in the interest of the Unit holders of the Scheme offered in this Scheme Information Document and keeping in view of the Right to Limit Redemptions

The Fund may also invest in Gold Related Instruments, money market instruments, bonds, securitised debts & other debt securities Credit & Interest Rate Risk

i. Although, the objective of the Fund is to seek to provide returns that closely correspond to returns provided by price of gold through investment in physical Gold and Gold related securities, the performance of the scheme may differ from that of the domestic prices of Gold due to expenses and or other related factors Competition Risks

An investment in Reliance ETF Gold BeES may be adversely affected by competition from other methods of investing in gold. The value of the units relates directly to the value of the gold held by the scheme and fluctuations in the price of gold could adversely affect investment value of the units.

The Reliance ETF Gold BeES is designed to mirror as closely as possible the performance of the price of gold bullion and the value of units directly relate to the value of the Gold held by the Scheme less the Scheme’s liabilities (including accrued but unpaid expenses). Gold prices have been quite volatile historically. The price of gold has fluctuated from a low of $530 to a high of $726 between Jan-06 and Feb-07 between based on the London AM Fix Several factors that may affect the price of gold are as follows:

a. Global gold supplies and demand, which is influenced by factors such as forward selling by gold producers, purchases made by gold producers to unwind gold hedge positions, central bank purchases and sales, and productions and cost levels in major gold producing countries such as the South Africa, the United States and Australia.

b. Investors’ expectations with respect to the rate of inflation;

c. Currency exchange rates;

d. Interest rates;

e. Investment and trading activities of hedge funds and commodity funds; and

f. Global or regional political, economic or financial events and situations.

g. In addition, investors should be aware that there is no assurance that gold will maintain its long-term value in terms of purchasing power in the future. In the event that the price of gold declines, the value of investment in units is expected to decline proportionately.

h. Changes in indirect taxes like custom duties for import, sales tax, VAT or any other levies will have an impact on the valuation of gold and consequently the NAV of the scheme.

i. Although, the objective of the Fund is to seek to provide returns that closely correspond to returns provided by price of gold through investment in physical Gold and Gold related securities, the performance of the scheme may differ from that of the domestic prices of Gold due to expenses and or other related factors Credit & Interest Rate Risk

The Fund may also invest in Gold Related Instruments, money market instruments, bonds, securitised debts & other debt securities as permitted under the Regulations which are subject to price, credit and interest rate risk. Trading volumes and settlement periods and transfer procedures may restrict liquidity in debt investments.

Right to Limit Redemptions

The Trustee, in the interest of the Unit holders of the Scheme offered in this Scheme Information Document and keeping in view of the unforeseen circumstances / unusual market conditions, may limit the total number of Units, which can be redeemed on any Working Day depending on the total “Underlying Stock of Gold” that can be readily sold in the local market available with the fund. Redemption Risk

The Unit Holders may note that even though this is an open-ended scheme, the Scheme would ordinarily repurchase Units in Creation Unit size. Thus unit holdings less than the Creation Unit size can normally only be sold through the secondary market, unless no quotes are available on the Exchange for 2 trading days consecutively. Further, the price received upon the redemption of Reliance
ETF Gold BeES units may be less than the value of the gold represented by them. The result obtained by subtracting the Fund’s expenses and liabilities on any day from the price of the gold owned by the fund on that day is the net asset value of the fund which, when divided by the number of units outstanding on that date, results in the net asset value per unit, or NAV.

Asset Class Risk

The domestic price of gold may vary from time to time. Further, the returns from the types of securities in which a Scheme invests may under perform returns from the various general securities markets or different asset classes. Different types of securities tend to go through cycles of out-performance and under performance in comparison of the general securities markets.

Passive Investments

As Reliance ETF Gold BeES is not actively managed, the underlying investments may be affected by a general decline in the domestic price of gold and other instruments invested under the plan. Reliance ETF Gold BeES invests in the Gold & securities mentioned in the asset allocation regardless of their investment merit. The AMC does not attempt to take defensive positions in declining markets. Further, the fund manager does not make any judgment about the investment merit nor shall attempt to apply any economic, financial or market analysis.

Tracking Error Risk

a. Tracking error means the variance between daily returns of the underlying benchmark (gold in this case) and the NAV of the scheme for any given period. NAV of the Scheme is dependent on valuation of gold. Gold has to be valued as per the formula provided by SEBI in its circular no. SEBI/IMD/CIR No. 2/65348/06 dated April 21, 2006. NAV so computed may vary from the price of Gold in the domestic market.

b. Factors such as the fees and expenses of the Scheme, cash balance, changes to the Underlying assets and regulatory policies may affect AMC’s ability to achieve close correlation with the Underlying assets!of the scheme. The Scheme’s returns may therefore deviate from those of its Underlying assets.

c. Tracking error could be the result of a variety of factors including but not limited to:
   (1) Delay in the purchase or sale of gold due to
      a. Illiquidity of gold,
      b. Delay in realisation of sale proceeds,
      c. Creating a lot size to buy the required amount of gold
   (2) The scheme may buy or sell the gold at different points of time during the trading session at the then prevailing prices which may not correspond to its closing prices.
   (3) The potential for trades to fail, which may result in the Scheme not having acquired gold at a price necessary to track the benchmark price.
   (4) The holding of a cash position and accrued income prior to distribution of income and payment of accrued expenses.
   (5) Disinvestments to meet redemptions, recurring expenses, dividend payouts etc.
   (6) Execution of large buy / sell orders
   (7) Transaction cost (including taxes and insurance premium) and recurring expenses
   (8) Realisation of Unit holders’ funds The scheme will endeavour to minimise the tracking error by
   (9) Setting off of incremental subscriptions against redemptions, during liquidity window
   (10) Use of gold related derivative instruments, as and when allowed by regulations
   (11) Rebalancing of the portfolio

d. Given the structure of Reliance ETF Gold BeES, the AMC expects the tracking error to be lower. The AMC will endeavour to keep the tracking error as low as possible. Under normal circumstances, such tracking errors are not expected to exceed 2% per annum. However this may vary when the markets are very volatile.

Tax Issues

The tax benefits described in this Scheme information document are as available under the present taxation laws and are available subject to relevant conditions. The information given is included only for general purpose and is based on advice received by the AMC regarding the law and practice currently in force in India and the Unit holders should be aware that the relevant fiscal rules or their interpretation may change. As is the case with any investment, there can be no guarantee that the tax position or the proposed tax position prevailing at the time of an investment or redemption in the Scheme will endure indefinitely. In view of the individual nature of tax consequences, each investor is advised to consult his / her own professional tax advisor. Gold is subject to indirect tax not restricted to the following: Sales Tax, Octroi, VAT, Stamp Duty, and Custom Duty.

B. REQUIREMENT OF MINIMUM INVESTORS IN THE SCHEME

The Scheme/Plan shall have a minimum of 20 investors and no single investor shall account for more than 25% of the corpus of the Scheme/Plan(s). However, if such limit is breached during the NFO of the Scheme, the Fund will endeavour to ensure that within a period of three months or the end of the succeeding calendar quarter from the close of the NFO of the Scheme, whichever is earlier, the Scheme complies with these two conditions. In case the Scheme / Plan(s) does not have a minimum of 20 investors in the stipulated period, the provisions of Regulation 39(2)(c) of the SEBI (MF) Regulations would become applicable automatically without any reference from SEBI and accordingly the Scheme / Plan(s) shall be wound up and the units would be redeemed at applicable NAV. The two conditions mentioned above shall also be complied within each subsequently calendar quarter thereafter, on an average basis, as specified by SEBI. If there is a breach of the 25% limit by any investor over
the quarter, a rebalancing period of one month would be allowed and thereafter the investor who is in breach of the rule shall be given 15 days notice to redeem his exposure over the 25 % limit. Failure on the part of the said investor to redeem his exposure over the 25 % limit within the aforesaid 15 days would lead to automatic redemption by the Mutual Fund on the applicable Net Asset Value on the 15th day of the notice period. The Fund shall adhere to the requirements prescribed by SEBI from time to time in this regard.

C. SPECIAL CONSIDERATIONS

The investors under the Scheme will bear the recurring expenses of the scheme in addition to the expenses of other schemes in which Fund of Fund scheme makes investment.

The Mutual Fund is not assuring or guaranteeing that it will be able to make regular periodical distributions units to its Unit holders though it has every intention to manage the portfolio so as to make periodical income distributions to Unit holders. Periodical distributions will be dependent on the returns achieved by the Asset Management Company through the active management of the portfolio. Periodical distributions may therefore vary from period to period, based on investment results of the portfolio.

Right to limit Purchase of units and/or Right to limit Redemption of units

The Trustee and AMC may, in the general interest of the Unit holders of the Scheme under this Scheme Information Document and keeping in view the unforeseen circumstances / unusual market conditions, limit the total number of Units which may be redeemed on any Working Day for redemption requests of more than Rs. 2 Lakhs per folio at a scheme level. in any Scheme. . In line with the SEBI Circular dated May 31, 2016 the following conditions would be applicable.

a. Restriction may be imposed when there are circumstances leading to a systemic crisis or event that severely constricts market liquidity or the efficient functioning of markets such as:
   i. Liquidity issues - when market at large becomes illiquid and affecting almost all securities.
   ii. Market failures, exchange closures - when markets are affected by unexpected events which impact the functioning of exchanges or the regular course of transactions. Such unexpected events could also be related to political, economic, military, monetary or other emergencies.
   iii. Operational issues – when exceptional circumstances are caused by force majeure, unpredictable operational problems and technical failures (e.g. a black out).

b. Restriction on redemption may be imposed for a specified period of time not exceeding 10 working days in any 90 days period.

c. When restriction on redemption is imposed, the following procedure shall be applied:
   i. No redemption requests upto INR 2 lakh shall be subject to such restriction.
   ii. Where redemption requests are above INR 2 lakh, AMCs shall redeem the first INR 2 lakh without such restriction and remaining part over and above INR 2 lakh shall be subject to such restriction.

However, suspension or restriction of redemption under any scheme of the Mutual Fund shall be made applicable only after the approval from the Board of Directors of the Asset Management Company and the Trustee Company. The approval from the AMC Board and the Trustees giving details of circumstances and justification for the proposed action shall also be informed to SEBI immediately.

2. All categories of Investors – for Physical mode

Magnetic Ink Character Recognition (MICR) instrument:

Any cheques/DD deposited in MICR clearing generally takes two days time and for certain locations beyond 2 days depending on the clearing cycle and for credit to beneficiary account. In some location, it takes three to seven days, since the clearing is depending on SBI or SBI associates or some of Public sector Banks.

Post Dated Cheque (PDC)

PDC is nothing but postdated cheques, which is generally obtained from the investors for SIP transactions at remote locations which are not covered by ECS or Auto Debit where an investor can opt for a SIP cycle and issue post dated cheques. The cheques are banked on the respective cycle dates and the clearing is based on the normal MICR clearing cycle as specified by RBI/SBI from time to time.

Transfer instrument

An Investor maintaining an account with the bank, where the scheme is also maintaining account, the transfer of funds takes place simultaneously and the Fund movement takes places in a seamless manner.

Weighted Average of Inflows into Debt Funds is maximum 2 days.
The above data for inflow of clear funds for equity and non liquid debt schemes is for the month of February, 2018. The average number of days of inflow of clear funds into Reliance Gold Savings Fund may differ depending on the mode/source of transaction.

RNAM will on immediate basis deploy the clear funds available in the scheme account either through stock exchange platform or directly through AMC.

C) Utilization of Funds

Transactions are accepted before the cut off time as specified by SEBI from time to time. All the transactions are reported in our Registrars and Transfer Agents system by the respective branches across India and funds get deposited into the banks accounts. On the basis of clear Funds being available for deployment, cash flows are reported to the fund manager on timely basis.

The inputs regarding cash flows by various modes of acceptance will be planned on a daily basis. The subscription/redemption request will also be reported and used as a basis for investing in Reliance ETF Gold BeES on realization of funds. This will also form the basis for subsequent deployment of funds in Reliance ETF Gold BeES. The deployment will be carefully planned on the basis of the mode of acceptance of instrument to moderate tracking error. Fund Manager will either execute trade the units of Reliance ETF Gold BeES on exchange or subscribe directly to Reliance ETF Gold BeES (direct via AMC) depending on market dynamics in the best interest if investors.

Risk Control

Since investing requires disciplined risk management, the AMC would incorporate adequate safeguards for controlling risks in the portfolio construction process. The fund will comply with all applicable exposure limits and take actions. Effective and continuous monitoring of the scheme shall be ensured and necessary actions, if any shall be taken, if required.

An investor can benefit under this facility by investing specified amounts regularly. By investing a fixed amount of rupees at regular intervals, one would end up buying more units of the Fund when the price is low and fewer units when the price is high. As a result, over a period of time, the average cost per unit to the unitholder may tend to be less than the average subscription price per unit, irrespective of whether it is a rising, falling or fluctuating market. Thus, the unitholder automatically tends to gains and averages out the fluctuations of the market, without having to monitor prices on a day-to-day basis. This concept is called “Rupee Cost Averaging”.

Minimum investment amount for investing SIP route is as follows:

1. Rs.100/- per month and in multiples of Re. 1/- thereafter for minimum 60 months

This aims to provide the investor a simplified method of aligning SIP installment amounts with increase in Investor’s earnings over the tenure of SIP.

Reliance Step-up feature will be provided in Reliance PSIP as per the existing features and the minimum amount per portfolio shall be Rs 1,000/- and in multiples of Rs 1,000/-. The features of the said facility are available in the Application Form.

Investors can avail either of the above two facilities i.e. Reallocation or Reliance Step-up for the same Reliance PSIP registration. Investor will not be able to avail both the facilities for the same Reliance PSIP registration.

g. Pause Facility under Reliance PSIP:

Under this facility, Investor can have an option to discontinue his Reliance PSIP temporarily (on a portfolio level) for specific number of installments. Instruction for “Pause” can be given by filling up the specific “Reliance PSIP Pause form”. Reliance PSIP would restart upon completion of the period specified by Investor.

For availing this facility following points are to be noted:

1. Investor can opt for pause facility only twice during the tenure of a particular Reliance PSIP;
2. The gap between the pause request and next SIP installment date should be atleast 21 business days;
3. SIP can be discontinued for minimum 1 installment and up to a maximum of 6 installments;
4. If the pause period is coinciding with the Reliance Step-Up facility, the Reliance PSIP installment amount post completion of pause period would be inclusive of Reliance Step-up amount. For e.g. Reliance PSIP installment amount prior to Pause period is Rs.5,000/- and Reliance Step-up amount is Rs.1,000/-. If the pause period is completed after date of Reliance Step-up, then the Reliance PSIP installment amount post completion of pause period shall be Rs.6,000/-. Investors are requested to note that Reallocation facility, Reliance Step-up Facility and Pause Facility shall be available only to the investors investing through Reliance PSIP.

RNAM reserves the right to withdraw / modify any of the offerings as provided above.

The scheme wherein the switch/es/STPs are undertaken shall satisfy the minimum application amount of the transferee scheme. Investors are required to refer to FAST enrolment form, Key Information Memorandum (KIM) and Scheme Information Document (SID) for more details. RNAM / RMF reserve the right to introduce, change, modify or withdraw the features available in this facility from time to time at its discretion with the prior notice.
7. Trigger Facility/ Reliance Golden Trigger
Under this facility the unit holders of the eligible schemes may opt for switch of units to RGSF on happening of any one of the events under the Trigger option as mentioned in the SID of the transferor scheme. This facility shall now be termed as Reliance Golden Trigger for all the units allotted through this option in RGSF. In case if the investor exercises an option wherein a Trigger is applied for withdrawal / switch-out from RGSF the same shall be termed as Trigger and not Reliance Golden Trigger. Under this facility the unit holders may opt for withdrawal/ switch of units to any other plan/ scheme on happening of any one of the following events under trigger option;

A. NAV reaches or crosses a particular value : E.g. NAV reaches or crosses Rs 11.00
   If NAV on the date of allotment of investment is less than Rs 11.00, the trigger will be activated when the NAV rises to Rs 11.00 or more on close of any day on which NAV is computed.
   If NAV on the date of allotment of investment is more than Rs 11.00, the trigger will be activated when the NAV falls to Rs 11.00 or below on close of any day on which NAV is computed.
   All transactions linked with trigger will be on the basis of the applicable NAV of the transaction day following the day on which NAV reaches, crosses or falls below Rs 11.00.

B. Change in the value of units held by unit holders atleast by certain percentage : E.g. Change in the value of Investment by atleast by (+ or - or +/-) 10%
   The trigger will be activated when value of the unitholding rises to 10% or more at the close of any day on which the NAV is declared; or The trigger will be activated when value of the unitholding falls by 10% or more at the end of any day on which the NAV is declared; or The trigger will be activated when value of the unitholding either rises by 10% or more or falls by 10% or more on any day on which the NAV is declared.

C. Date Based Trigger:
   Investors can now choose any particular date to activate the trigger.
   Date based trigger facility enables investors to redeem / switch investments from a particular scheme on a pre-determined date to any other eligible open ended scheme offered by Reliance Mutual Fund. The trigger would be activated on the date mentioned by the investor. Trigger will be processed with NAV of the specified date under this facility or with NAV of the subsequent business day if the specified date is a non-business day.
   The unit holders can now opt for the following action, on the date of happening of the relevant events/ triggers opted under the trigger facility:
   1. Full/ Partial redemption
   2. Redemption to the extent of capital appreciation only
   3. Full/ Partial switch into other eligible plan/ scheme of RMF
   4. Switch of only the appreciation into other plan/ scheme of RMF

Transactions linked with the triggers will be executed at the applicable NAVs for the transaction day following the day on which the trigger situation has arisen. Further all the predetermined events i.e. rise or fall in the NAV upto a particular % or value will be compared with the value of units or NAV prevailing on the date of allotment of units, irrespective of the fact whether the trigger is opted on the date of allotment or subsequently.

For e.g. an investor has invested at Rs 11.00 and opted for full redemption, if NAV appreciates atleast by 10%, trigger will be activated on the transaction day when NAV moves to 12.10 (i.e. 10% more than Rs 11/-) or more.

Trigger facility shall be activated after 7 calendar days of the receipt of trigger request. A trigger once activated will not be reactivated in any other plan/ scheme where the Switch happens or in the same plan which retains a part of the value or in case of normal redemption /switch before the trigger is activated. Triggers will be deactivated on redemption and/or switch and/or pledge of units.

Trigger, thus, acts as a financial planning tool and enables the investor to minimise the losses and timely book profits.

Navs of the schemes are declared at the close of the business day and hence Value of the unit holders unit holdings based on the end of day NAV will be considered as a base for activating the triggers. Accordingly, all the redemptions/ switches etc will be done on the following transaction day on which the event occurs.

Please note that trigger is an additional facility provided to the unit holders to save the time for completing the redemption/ switch formalities on happening of a particular event. Trigger is not to be conceived as an assurance on part of the Fund that the investor will manage to receive a particular sum of money/ appreciation/ and/ or fixed % of sum. Trigger is an event on happening of which the Fund will automatically redeem/ switch units on behalf of the investor on the date of happening of the event. In actual parlance, a trigger will activate an automatic transaction when the event selected for has reached a value greater or less that the specified value (trigger point).

Trigger request is required to be given per transaction by filling in the relevant form. In the event of multiple triggers for a particular transaction, the trigger request will be considered invalid and rejected.

Delay in payment of redemption / repurchase proceeds

The Asset Management Company shall be liable to pay interest to the unitholders at such rate as may be specified by SEBI for the period of such delay (presently @15% per annum).

How to Redeem

The Units can be redeemed at the Redemption Price.

A Unitholder has the option to request for a redemption either by amount (in Rupees) or by number of Units. If the redemption request indicates both amount (in Rupees) and number of Units, the latter will be considered. Where a Rupee amount is specified or deemed to be specified for redemption, the number of Units redeemed will be the amount redeemed divided by the Redemption Price. Alternatively, a unitholder can request closure of his account, in which case, the entire unit balance lying to the credit of his account will be redeemed.

The number of Units so redeemed will be subtracted from the unitholder’s account balance and a statement to this effect will be issued to the unitholder.
In case the balance in unitholder's account does not cover the amount of redemption request the Fund may close the unitholder's account and send the entire such (lesser) balance to the unitholders.

If an investor has purchased Units on more than one working day, the Units purchased prior in time (i.e. those Units which have been held for the longest period of time), will be deemed to have been redeemed first, i.e. on a First In First Out Basis.

Units purchased by cheque / DD will be marked under lien and will not be redeemed until after realisation of the cheques/DD.

Note: The processing of Redemption/Switch/Various transaction request (s) where realization status is not available, RMF shall keep the units allotted to investor on hold for redemption/switch/ Various transactions till the time the payment is realized towards such purchase transaction(s).

In case if the customer submits a redemption / switch / Various other transaction request like SWP, STP when the units are on hold, RMF reserves the right to reject/ partially process the redemption/ switch/ Various transaction request, as the case may be, based on the realization status of the units held by the investor. In all the above cases (i.e., rejection/partial processing), intimation will be sent to the investor accordingly. Whenever a redemption/switch/ Various transaction request is rejected then an investor needs to submit a fresh request for reprocessing the same.

Units which are not redeemed/switched out on account of the request being rejected due to non realization of funds, will be processed only upon confirmation of realization status and submission of a fresh redemption/switch request for such transactions.

The transaction slip can be used by the investor to make a redemption or Inter scheme Switch or Inter plan Switch or Inter Option Switch by entering the requisite details in the transaction slip and submitting the same at the Designated Investor Service Centre. Transaction slips can be obtained from any of the Designated Investor Service Centres.

While submitting the details for processing any transactions which inter alia includes redemptions, switch out, and systematic transfers etc. there has to be a specific mention about the plan (Direct Plan or Other than Direct Plan ) from which the transactions has to be initiated. If no plan is mentioned, redemption request will be processed on a first in first out (FIFO) basis considering both the plans.

RNAM reserves the right to provide the facility of redeeming units of the Scheme through an alternative mechanism as may be decided by the Fund from time to time. The alternative mechanism may include electronic means of communication such as redeeming units online through the website(s) etc.

The difference in the applicable net asset values of the two schemes / plans / options will be reflected in the number of Units allotted.

D. COMPUTATION OF NAV

The Net Asset Value (NAV) of the Units will be determined daily or as prescribed by the Regulations. The NAV shall be calculated in accordance with the following formula, or such other formula as may be prescribed by SEBI from time to time.

\[
\text{NAV} = \frac{\text{Market/Fair Value of Scheme’s Investments} + \text{Receivables} + \text{Accrued Income} + \text{Other Assets} - \text{Accrued Expenses}}{\text{Payables} - \text{Other Liabilities}} \div \text{Number of Units Outstanding}
\]

Rounding off policy for NAV

Net Asset Value of the Units in the Scheme is calculated in the manner provided in this Scheme Information Document or as may be prescribed by Regulations from time to time. The NAV will be computed upto four decimal places.

The underlying units will be valued at market price of underlying units as traded on the principal exchange. In case the units of underlying ETF get classified as thinly traded / non traded the same may be valued as per the underlying NAV of the fund. For the purposes of determination of the thinly traded / non traded securities the definitions in the SEBI regulations pertaining to equity schemes shall be applied, since there are no specific references to Gold based units. Computation of NAV will be done after taking into account dividends declared, if any, and the distribution tax thereon, if applicable. The income earned and the profits realized in respect of the Units remain invested and are reflected in the NAV of the Units.

| Amount Invested                  | 100,000.00       |
| NAV at the time of Investment    | 10.00            |

| Actual NAV at end of 1 year post expenses (assuming Expense Ratio as above) | 11.09 |
| Value of Investment at end of 1 year (Before Expenses) | 112,000.00 |
| Value of Investment at end of 1 year (After Expenses) | 110,940.00 |

Note: Please note that the above is an approximate illustration of the impact of expense ratio on the returns, where the Gross NAV has been simply reduced to the extent of the expenses. In reality, the actual impact would vary depending on the path of returns over the period of consideration. Expenses will be charged on daily net assets.

For the previous financial year (2017-2018) the underlying scheme of Reliance Gold Savings Fund was Reliance ETF Gold BeES and the expense ratio of the Fund for (2017-18) was 1.00%.

The purpose of the above table is to assist the investor in understanding the various costs and expenses that an investor in the scheme will bear directly or indirectly.

The above expenses are fungible within the overall maximum limit prescribed under SEBI (Mutual Funds) Regulations, 1996, which means there will be no internal sub-limits on expenses and AMC is free to allocate them within the overall TER.

In terms of the SEBI [Mutual Fund] Regulations, 1996 (as amended from time to time), the mutual fund schemes are permitted to invest in securitized debt. Accordingly, investments in certain Pass Through Certificates (“PTC’s”) of a securitization trust (“the Trust”) were made through some of schemes of Reliance Mutual Fund (“the Fund”). The returns filed by few of these securitisation Trusts whose PTCs were held by the Fund were taken up for scrutiny by the Income Tax Authorities which raised demand initially on the Trusts. However, on failure to recover, the Income Tax Authorities sent the demand notices to the Fund for Assessment Years 2009-10 and 2010-11. The Fund in consultation with its tax & legal advisors has contested the applicability of such demand and proceedings there on are still pending. It may be noted that this is a matter, which is not restricted only to the Fund but is an industry issue. Accordingly, through the Association of Mutual Funds in India (AMFI), the matter has also been appropriately escalated to the Ministry of Finance, in order to seek necessary clarifications, reliefs and if required, to carry out necessary amendments to the relevant provisions of the Income Tax Act, 1961. In addition to the above the AMC is party to certain litigations in various courts, commissions etc. which are in ordinary course of business & have no material impact.
