I – INTRODUCTION

A. RISK FACTORS

1. STANDARD RISK FACTORS

   i. Mutual Funds and securities investments are subject to market risks such as trading volumes, settlement risk, liquidity risk, and default risk including the possible loss of principal and there is no assurance or guarantee that the objectives of the Scheme will be achieved.

   ii. As the price / value / interest rate of the securities in which the scheme invests fluctuates, the NAV of the units issued under the Scheme can go up or down depending on the factors and forces affecting the capital markets.

   iii. Past performance of the Sponsor/AMC/Mutual Fund is not indicative of the future performance of the Scheme.

   iv. Reliance Overnight Fund is only the name of the Scheme and does not in any manner indicate either the quality of the Scheme, its future prospects or returns.

   v. The Sponsor is not responsible or liable for any loss resulting from the operation of the Scheme beyond their initial contribution of Rs. 1 lakh towards the setting up of the Mutual Fund and such other accretions and additions to the corpus.

   vi. The present scheme is not a guaranteed or assured return scheme. The Mutual Fund is not guaranteeing or assuring any dividend. The Mutual Fund is also not assuring that it will make periodical dividend distributions, though it has every intention of doing so. All dividend distributions are subject to the availability of the distributable surplus of the scheme.

2. SCHEME SPECIFIC RISK FACTORS

   i. Risks associated with investing in Bonds

      Investment in Debt is subject to price, credit, and interest rate risk. The NAV of the Scheme may be affected, inter alia, by changes in the market conditions, interest rates, trading volumes, settlement periods and transfer procedures.

      Investing in Bonds and Fixed Income securities are subject to the risk of an Issuer’s inability to meet principal and interest payments obligation (credit risk) and may also be subject to price volatility due to such factors as interest rate sensitivity, market perception of the creditworthiness of the issuer and general market liquidity (market risk).

      The timing of transactions in debt obligations, which will often depend on the timing of the Purchases and Redemptions in the Scheme, may result in capital appreciation or depreciation because the value of debt obligations generally varies inversely with the prevailing interest rates.

      a. Interest Rate Risk

         As with all debt securities, changes in interest rates will affect the Scheme’s Net Asset Value as the prices of securities generally increase as interest rates decline and generally decrease as interest rates rise. Prices of longer-term securities generally fluctuate more in response to interest rate changes than do shorter-term securities. Interest rate movements in the Indian debt markets can be volatile leading to the possibility of large price movements up or down in debt and money market securities and thereby to possibly large movements in the NAV.

      b. Liquidity or Marketability Risk

         This refers to the ease at which a security can be sold at or near its true value. The primary measure of liquidity risk is the spread between the bid price and the offer price quoted by a dealer. Liquidity risk is characteristic of the Indian fixed income market.

      c. Credit Risk

         Credit risk or default risk refers to the risk which may arise due to default on the part of the issuer of the fixed income security (i.e. will be unable to make timely principal and interest payments on the security). Because of this risk debentures are sold at a yield spread above those offered on Treasury securities, which are sovereign obligations and generally considered to be free of credit risk. Normally, the value of a fixed income security will fluctuate depending upon the actual changes in the perceived level of credit risk as well as the actual event of default.

      d. Reinvestment Risk

         This risk refers to the interest rate levels at which cash flows received from the securities in the Scheme or from maturities in the Scheme are reinvested. The additional income from reinvestment is the “interest on interest” component. The risk refers to the fall in the rate for reinvestment of interim cash flows.

      e. Risks associated with various types of securities

         | CREDIT RISK                  | LIQUIDITY RISK  | PRICE RISK              |
         |------------------------------|-----------------|-------------------------|
         | Listed                       | Depends on credit quality | Relatively Low          | Depends on duration of instrument |
         | Unlisted                     | Depends on credit quality | Relatively High         | Depends on duration of instrument |
         | Secured                      | Relatively low   | Relatively Low          | Depends on duration of instrument |
         | Unsecured                    | Relatively high  | Relatively High         | Depends on duration of instrument |
         | Rated                        | Relatively low and depends on the rating | Relatively Low          | Depends on duration of instrument |
         | Unrated                      | Relatively high  | Relatively High         | Depends on duration of instrument |
Different types of securities in which the scheme would invest as given in the Scheme Information Document carry different levels and types of risk. Accordingly, the scheme’s risk may increase or decrease depending upon its investment pattern e.g. corporate bonds, carry a higher level of risk than Government securities. Further even among corporate bonds, bonds which are AAA rated are comparatively less risky than bonds which are AA rated.

ii. Risk factors associated with repo transactions in corporate bonds -
   o The market for the aforesaid product is over the counter (OTC) and illiquid. Hence, repo obligations cannot be easily sold to other parties. If a counterparty fails, the scheme would have to take recourse to the collateral provided. If a counterparty fails to repay and the value of the collateral falls beyond the haircut, then the Scheme would be exposed to a loss of interest or principal
   o Further, if the Scheme needs to take recourse to the debt securities provided as collateral, and the issuer of the debt securities makes a default, the scheme may lose the whole, or substantial portion of the amount. This risk is somewhat mitigated by the fact that only bonds which have credit rating of AA and above can be accepted as collateral for repo transactions.

iii. Other Scheme Specific Risk factors
   a. The liquidity of the Scheme’s investments may be inherently restricted by trading volumes, settlement periods and transfer procedures. In the event of an inordinately large number of redemption requests, or of a re-structuring of the Scheme’s investment portfolio, these periods may become significant. Please read the Sections of this Scheme Information Document entitled “Special Considerations” and “Right to Limit Redemptions” thereunder.
   b. Although, the objective of the Fund is to generate optimal returns, the objective may or may not be achieved. The investors may note that if the AMC/Investment Manager is not able to make right decision regarding the timing of increasing exposure in debt securities in times of falling equity market, it may result in negative returns. Given the nature of scheme, the portfolio turnover ratio may be on the higher side commensurate with the investment decisions and Asset Allocation of the Scheme. At times, such churning of portfolio may lead to losses due to subsequent negative or unfavorable market movements.
   c. Credit And Rating Downgrade Risk, Prepayment And Foreclosures Risk for Senior PTC Series, Prepayment And Foreclosures Risk for Senior PTC Series, Servicing Agent Risk, Co-mingling Risk, and Bankruptcy of the Seller.
   d. The NAV of the scheme to the extent invested in Debt and Money market securities are likely to be affected by changes in the prevailing rates of interest and are likely to affect the value of the Scheme’s holdings and thus the value of the Scheme’s Units.
   e. The AMC may, considering the overall level of risk of the portfolio, invest in lower rated/ unrated securities offering higher yields. This may increase the risk of the portfolio.
   f. Securities which are not quoted on the stock exchanges are inherently illiquid in nature and carry a larger amount of liquidity risk, in comparison to securities that are listed on the exchanges or offer other exit options to the investor, including a put option. The AMC may choose to invest in unlisted securities that offer attractive yields. This may increase the risk of the portfolio.
   g. While securities that are listed on the stock exchange carry lower liquidity risk, the ability to sell these investments is limited by the overall trading volume on the stock exchanges. Money market securities, while fairly liquid, lack a well-developed secondary market, which may restrict the selling ability of the Scheme and may lead to the Scheme incurring losses till the security is finally sold.
   h. Investment decisions made by the AMC may not always be profitable, even though it is intended to generate capital appreciation and maximize the returns by actively investing in equity and equity related securities.
   i. The tax benefits available under the scheme are as available under the present taxation laws and are available only to certain specified categories of investors and that is subject to fulfillment of the relevant conditions. The information given is included for general purposes only and is based on advise that the AMC has received regarding the law and the practice that is currently in force in India and the investors and the Unitholders should be aware that the relevant fiscal rules and their interpretation may change. As is the case with any investment, there can be no guarantee that the tax position or the proposed tax position prevailing at the time of investment in the Scheme will endure indefinitely. In view of the individual nature of tax consequences, each Investor/Unitholder is advised to consult his/her own professional tax advisor.

B. REQUIREMENT OF MINIMUM INVESTORS IN THE SCHEME

The Scheme/Plan shall have a minimum of 20 investors and no single investor shall account for more than 25% of the corpus of the Scheme/Plan(s). However, if such limit is breached during the NFO of the Scheme, the Fund will endeavor to ensure that within a period of three months or the end of the succeeding calendar quarter from the close of the NFO of the Scheme, whichever is earlier, the Scheme complies with these two conditions. In case the Scheme/Plan(s) does not have a minimum of 20 investors in the stipulated period, the provisions of Regulation 39(2)(c) of the SEBI (MF) Regulations would be applicable automatically without any reference from SEBI and accordingly the Scheme/Plan(s) shall be wound up and the units would be redeemed at applicable NAV. The two conditions mentioned above shall also be complied within each subsequent calendar quarter thereafter, on an average basis, as specified by SEBI. If there is a breach of the 25% limit by any investor over the quarter, a rebalancing period of one month would be allowed and thereafter the investor who is in breach of the rule shall be given 15 days notice to redeem his exposure over the 25% limit. Failure on the part of the said investor to redeem his exposure over the 25% limit within the aforesaid 15 days would lead to automatic redemption by the Mutual Fund on the applicable Net Asset Value on the 15th day of the notice period. The Fund shall adhere to the requirements prescribed by SEBI from time to time in this regard.

C. SPECIAL CONSIDERATIONS, IF ANY

1. Income Distribution

The Mutual Fund is not assuring or guaranteeing that it will be able to make regular periodical income distributions to its Unitholders, though it has every intention to manage the portfolio so as to make periodical income distributions. Income distributions will be dependent on the availability of distributable and the returns achieved by the Asset Management Company through active management of the portfolio. Periodical income distributions may therefore vary from period to period, based on investment results of the portfolio.
2. Right to limit Purchase of units and/or Right to limit Redemption of units

The Trustee and AMC may, in the general interest of the Unit holders of the Scheme under this Scheme Information Document and keeping in view the unforeseen circumstances / unusual market conditions, limit the total number of Units which may be redeemed on any Working Day for redemption requests of more than Rs. 2 Lakhs per folio at a scheme level in any Scheme. In line with the SEBI Circular dated May 31, 2016 the following conditions would be applicable.

a. Restriction may be imposed when there are circumstances leading to a systemic crisis or event that severely constricts market liquidity or the efficient functioning of markets such as:
   i. Liquidity issues - when market at large becomes illiquid and affecting almost all securities.
   ii. Market failures, exchange closures - when markets are affected by unexpected events which impact the functioning of exchanges or the regular course of transactions. Such unexpected events could also be related to political, economic, military, monetary or other emergencies.
   iii. Operational issues – when exceptional circumstances are caused by force majeure, unpredictable operational problems and technical failures (e.g. a black out).

b. Restriction on redemption may be imposed for a specified period of time not exceeding 10 working days in any 90 days period.

c. When restriction on redemption is imposed, the following procedure shall be applied:
   i. No redemption requests upto INR 2 lakh shall be subject to such restriction.
   ii. Where redemption requests are above INR 2 lakh, AMCs shall redeem the first INR 2 lakh without such restriction and remaining part over and above INR 2 lakh shall be subject to such restriction.

However, suspension or restriction of redemption under any scheme of the Mutual Fund shall be made applicable only after the approval from the Board of Directors of the Asset Management Company and the Trustee Company. The approval from the AMC Board and the Trustees giving details of circumstances and justification for the proposed action shall also be informed to SEBI immediately.

II - INFORMATION ABOUT THE SCHEME - RELIANCE OVERNIGHT FUND

A. TYPE OF THE SCHEME
An open-ended debt scheme investing in overnight securities

B. WHAT IS THE INVESTMENT OBJECTIVE OF THE SCHEME?
To generate optimal returns with low risk and high liquidity by investing in debt and money market instruments with overnight maturity. However, there can be no assurance or guarantee that the investment objective of the scheme will be achieved.

C. HOW WILL THE SCHEME ALLOCATE ITS ASSETS?
Under normal circumstances, the indicative asset allocation shall be as follows:

<table>
<thead>
<tr>
<th>Instruments</th>
<th>Indicative allocations (% of total assets)</th>
<th>Risk Profile</th>
</tr>
</thead>
<tbody>
<tr>
<td>Debt &amp; money market instruments (including MIBOR linked instruments with daily put and call option maturing on or before next business day)</td>
<td>Minimum: 0%  Maximum: 100%</td>
<td>Low</td>
</tr>
</tbody>
</table>

The cumulative gross exposure through debt and money market positions should not exceed 100% of the net assets of the scheme.

Liquidity in the scheme may be provided through borrowing to meet redemptions in accordance with the SEBI Regulations.

The scheme will not invest in Securitized Debt, Derivatives, Foreign Securities, Credit Default Swaps, Securities Lending and Short Selling.

The above is indicative and is subject to change keeping in view the market conditions and opportunities, applicable Regulations and politico-economic factors. The investment manager in line with the investment objective may alter the above pattern for short term and on defensive consideration.

The AMC reserves the right to change the above asset allocation pattern in the interest of the investors depending on the market conditions for a short-term period of defensive consideration.

In case any deviation from the asset allocation and/or duration of the scheme, the fund manager will carry out rebalancing within 30 days. Where the portfolio is not re-balanced within 30 days, justification for the same shall be placed before the Investment Committee and reasons for the same shall be recorded in writing. The Investment Committee shall then decide on the course of action. However, at all times the portfolio will adhere to the overall investment objectives of the Scheme.

D. WHERE WILL THE SCHEME INVEST?
Subject to the SEBI Regulations, the Scheme may invest in various types of instruments including, but not limited to, any of the following:

a) Commercial Paper (CP), Certificate of Deposits (CD), Treasury Bills, Bills Rediscounting, Tri-party Repo, Repo/ Reverse Repo (including repo in corporate bonds)

b) Investment in Government securities issued by Central and State Government to the extent of SEBI prescribed limits. Such securities may be:
   (i) Supported by the ability to borrow from the Treasury or
   (ii) Supported by Sovereign guarantee or the State Government or
   (iii) Supported by Government of India/ State Government in some other way.

c) Corporate Bonds include all debt instruments issued by entities such as Banks, Public Sector Undertakings, Government Agencies and other Statutory Bodies, Municipal Corporations, body corporate, companies, trusts/ Special Purpose Vehicles etc. and would exclude investments in Government Securities issued by Central and State Government.

d) Securities issued by any government agencies, quasi-government or statutory bodies, Public Sector Undertakings, which may or may not be guaranteed or supported by the Central Government or any state government (including but not limited to coupon bearing bonds, zero coupon bonds and treasury bills)

e) Non-convertible securities as well as nonconvertible portion of convertible securities, such as debentures, coupon bearing bonds, zero coupon bonds, deep discount bonds, Mibor-linked or other floating rate instruments, premium notes and other debt securities or obligations of public sector undertakings, banks, financial institutions, corporations, companies and other bodies corporate as may be permitted by SEBI/ RBI from time to time

f) Deposits with banks and other bodies corporate as may be permitted by SEBI from time to time

g) The Fund may also enter into “Repo” (Repos including repo in corporate bonds), hedging or such other transactions as may be allowed to Mutual Funds from time to time.

In line with SEBI circular dated November 11, 2011 investments in corporate bond repo shall be made basis the policy approved by the Board of RNAM and RCTC. The significant features are as follows:

(i) As specified in the SEBI Circular dated November 15, 2012, the base of eligible securities for mutual funds to participate in repo in corporate debt securities is from AAA rated to AA and above rated corporate debt securities.
(ii) Category of counterparty & Credit rating of counterparty RMF schemes shall enter in lending via Repo only with Investment Grade counterparties (as required by SEBI Regulations) which are part of the approved debt universe (i.e. on which we have limits).

(iii) Restriction pertaining to tenor of Collateral for FMPs, the tenor of the collateral should expire before the maturity of the scheme. For other schemes, the collateral should comply with the maturity restrictions placed, if any, for those schemes in the Debt Investment Policy.

(iv) Applicable haircut: RBI in its circular had indicated the haircut to be applied for such transactions as follows:

<table>
<thead>
<tr>
<th>S.No.</th>
<th>Rating</th>
<th>Minimum Haircut</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>AAA</td>
<td>7.5%</td>
</tr>
<tr>
<td>2</td>
<td>AA+</td>
<td>8.5%</td>
</tr>
<tr>
<td>3</td>
<td>AA</td>
<td>10%</td>
</tr>
</tbody>
</table>

The above haircuts are minimum stipulated haircuts where the repo period is overnight or where the re-margining frequency (in case of longer tenor repos) is daily. The RBI had earlier recommended a haircut of 25%. It is proposed that we maintain a minimum haircut of 15% for all repo contracts of less than 3 months, and 25% for other contracts, unless a lower haircut is approved by the Investment Committee. The Fund Manager may refer to the rating-haircut matrix published by FIMMDA, to determine the appropriate haircut.

h) The schemes may also enter into repurchase and reverse repurchase obligations in all securities (including Repos in corporate bonds) held by them as per the guidelines and regulations applicable to such transactions. The scheme may also invest into tri-party Repo (like Tri-party Repo Anonymous Order Matching System (TREPS)) as per the prescribed guidelines of RBI.

i) Any other debt and money market instruments that may be available from time to time.

The securities mentioned above could be listed, unlisted, publicly offered, privately placed, secured, unsecured, rated or unrated and of varying maturity. The securities may be acquired through public offerings (IPOs), secondary market operations, private placement, rights offer or negotiated deals.

A mutual fund scheme shall not invest more than 10% of its NAV in debt instruments comprising money market instruments and non-money market instruments issued by a single issuer which are rated not below investment grade by a credit rating agency authorized to carry out such activity under the Act. Such investment limit may be extended to 12% of the NAV of the scheme with the prior approval of the Board of Trustees and the Board of directors of the asset management company:

a) Provided that such limit shall not be applicable for investments in Government Securities, treasury bills and collateralized borrowing and lending obligations;

b) Provided further that investment within such limit can be made in mortgaged backed securitized debt which are rated not below investment grade by a credit rating agency registered with the Board;

c) Provided further that the schemes already in existence shall within an appropriate time and in the manner, as may be specified by the Board, conform to such limits.

Mutual Funds/AMCs shall ensure that total exposure of debt schemes of mutual funds in a group (excluding investments in securities issued by Public Sector Units, Public Financial Institutions and Public Sector Banks) shall not exceed 20% of the net assets of the scheme. Such investment limit may be extended to 25% of the net assets of the scheme with the prior approval of the Board of Trustees.

E. WHAT ARE THE INVESTMENT STRATEGIES?

The fund management team will endeavor to maintain a consistent performance in the scheme by maintaining a balance between safety, liquidity and profitability aspects of various investments. The fund manager will try to achieve an optimal risk return balance for management of the fixed income portfolios.

The investments in debt instruments carry various risks like interest rate risk, liquidity risk, default risk, purchasing power risk etc. While they cannot be done away with, they can be minimized by diversification and effective use of hedging techniques.

The fund management team will take an active view of the interest rate movement by keeping a close watch on various parameters of the Indian economy, as well as developments in global markets.

Investment views / decisions will be taken on the basis of the following parameters:

1. Prevailing interest rate scenario
2. Quality of the security / instrument (including the financial health of the issuer)
3. Maturity profile of the instrument
4. Liquidity of the security
5. Growth prospects of the company / industry
6. Any other factors in the opinion of the fund management team

Risk Measurement /Control

The Fund Management proposes to use analytic risk management tools like VAR / convexity/ modified duration for effective portfolio management

Portfolio Turnover

Given the nature of the Scheme, the portfolio turnover ratio may be very high and AMC may change the portfolio from debt to money market and vice versa according to Asset Allocation, commensurate with the investment objectives of the Scheme. The effect of higher portfolio turnover could be higher brokerage and transaction costs.
Debt Market in India

The Indian Debt market is facing major shift in the recent times. The substantial growth in Mutual Fund collections in the past few years have provided an easy route for the investors to channelise their savings into the debt market, which otherwise is largely dominated by Banks and other Institutional investors.

At present, the Indian debt market is dominated by issues of Central Government bonds, Corporate Debentures and PSU Bonds. The new Securitised instruments are also very attractive in the primary market. Risk associated with securitized Debt or PTCs are credit risk, liquidity risk and price risk/interest rate risk. The other instruments available for investment are Commercial Papers, Certificate of Deposits, Government guaranteed bonds, etc.

Brief details about the instruments are given below as on Nov 9, 2018.

Forward Rate Agreements (FRAs)

A FRA is a financial contract between parties agreeing to exchange interest payments for a notional principal amount on settlement dates for a specified period from start date to maturity date.

A FRA enables parties to fix interest cost on a future borrowing or fix an interest rate for a future investment.

Hedging a future asset

Example: Suppose, RMF has funds to invest after two months for a period of three months. The Fund Manager expects interest rates to soften in the next two months. He, therefore, would like to lock-in the interest rate today for his investment to be made after two months. The instrument in which he wishes to invest is a 91-day Treasury Bill at 8.25% p.a. He, therefore, enters into an agreement where he sells a 2 x 5 FRA for a notional principal amount. 2 represents the start date of the FRA and 5 represents the maturity date or end date.

The details will be as under

Asset : 91-day T' Bill

Tenor : 3 months commencing from 2 months from date of agreement.

Indicative 2 x 5 : 8.25% p.a.

Benchmark : 91-day T' Bill cut-off yield on the last auction preceding settlement date

So RMF receives 8.25% p.a. on the notional amount on settlement date. Counterparty will receive 91-day T' Bill cut-off rate on the 91-day T' Bill auction, on the auction just preceding the settlement date.

Both, IRS and FRAs can be thus effectively used as hedging products for interest rate risks.

Risk Factors

Derivatives products carry the credit risk (risk of default by counterparty), market risk (due to market movements) and liquidity risk (due to lack of liquidity in derivatives).

1. No principal amount is exchanged. A notional principal amount is agreed upon for interest calculation purposes.

2. Only the difference between the two rates is exchanged at agreed intervals or payment dates. When fixed interest rate amount is higher, the fixed rate payer pays the difference amount i.e. fixed interest rate amount minus the floating interest rate amount or vice-versa.

RMF / RNAM reserve the right to introduce, change, modify or withdraw the features available in this facility from time to time.

6. Systematic Investment Plan (SIP)

An investor can benefit under this facility by investing specified amounts regularly. By investing a fixed amount of rupees at regular intervals, one would end up buying more units of the Fund when the price is low and fewer units when the price is high. As a result, over a period of time, the average cost per unit to the unitholder may tend to be less than the average subscription price per unit, irrespective of whether it is a rising, falling or fluctuating market. Thus, the unitholder automatically tends to gains and averages out the fluctuations of the market, without having to monitor prices on a day to day basis. This concept is called “Rupee Cost Averaging”.

Minimum investment amount for investing SIP route is as follows:

1. Rs.100/- per month and in multiples of Re. 1/- thereafter for minimum 6 months
2. Rs.500/- per month and in multiples of Rs. 1/- thereafter for minimum 12 months
3. Rs.1000/- per month and in multiples of Rs. 1/- thereafter for minimum 6 months
4. Rs.500/- per quarter and in multiples of Rs. 1/- thereafter for minimum 12 quarters
5. Rs.1500/- per quarter and in multiples of Rs. 1/- thereafter for minimum 4 quarters
6. Rs. 5000/- per year and in multiples of Rs. 500/- thereafter for minimum 2 years

The cheques should be drawn in favour of “Reliance Overnight Fund A/c PAN” or “Reliance Overnight Fund A/C First Investor Name” and crossed “Account Payee Only” and must be payable at the centre where the applications are submitted to the Customer Service Centre.   An investor can benefit under this facility by investing specified amounts regularly. By investing a fixed amount of rupees at regular intervals, one would end up buying more units of the Fund when the price is low and fewer units when the price is high. As a result, over a period of time, the average cost per unit to the unitholder may tend to be less than the average subscription price per unit, irrespective of whether it is a rising, falling or fluctuating market. Thus, the unitholder automatically tends to gains and averages out the fluctuations of the market, without having to monitor prices on a day-to-day basis. This concept is called “Rupee Cost Averaging”.

RNAM reserves the right to withdraw / modify any of the offerings as provided above.

The scheme wherein the switches/STPs are undertaken shall satisfy the minimum application amount of the transferee scheme. Investors are required to refer to FAST enrolment form, Key Information Memorandum (KIM) and Scheme Information Document (SID) for more details. RNAM / RMF reserve the right to introduce, change, modify or withdraw the features available in this facility from time to time at its discretion with the prior notice.

vii. **Trigger Facility**
Under this facility the unit holders may opt for withdrawal/ switch of units to any other plan/ scheme on happening of any one of the following events under trigger option:

A. NAV reaches or crosses a particular value:
   E.g. NAV reaches or crosses Rs 11.00
   If NAV on the date of allotment of investment is less than Rs 11.00, the trigger will be activated when the NAV rises to Rs 11.00 or more on close of any day on which NAV is computed.
   If NAV on the date of allotment of investment is more than Rs 11.00, the trigger will be activated when the NAV falls to Rs 11.00 or below on close of any day on which NAV is computed
   All transactions linked with trigger will be on the basis of the applicable NAV of the transaction day following the day on which NAV reaches, crosses or falls below Rs 11.00

B. Change in the value of units held by unit holders at least by certain percentage:
   E.g. Change in the value of Investment by at least by (+ or - or +/-) 10%
   The trigger will be activated when value of the unitholding rises to 10% or more at the close of any day on which the NAV is declared; or The trigger will be activated when value of the unitholding falls by 10% or more at the end of any day on which the NAV is declared; or The trigger will be activated when value of the unitholding either rises by 10% or more or falls by 10% or more on any day on which the NAV is declared.

C. **Date Based Trigger:** Investors can now choose any particular date to activate the trigger. Date based trigger facility enables investors to redeem / switch investments from a particular scheme on a pre-determined date to any other eligible open ended scheme offered by Reliance Mutual Fund. The trigger would be activated on the date mentioned by the investor. Trigger will be processed with NAV of the specified date under this facility or with NAV of the subsequent business day if the specified date is a non-business day.

The unit holders can now opt for the following action, on the date of happening of the relevant events/ triggers opted under the trigger facility:
1. Full/ Partial redemption
2. Redemption to the extent of capital appreciation only
3. Full/ Partial switch into other eligible plan/ scheme of RMF
4. Switch of only the appreciation into other plan/ scheme of RMF
Transactions linked with the triggers will be executed at the applicable NAVs for the transaction day following the day on which the trigger situation has arisen. Further all the predetermined events i.e. rise or fall in the NAV upto a particular % or value will be compared with the value of units or NAV prevailing on the date of allotment of units, irrespective of the fact whether the trigger is opted on the date of allotment or subsequently.

For e.g. an investor has invested at Rs 11.00 and opted for full redemption, if NAV appreciates at least by 10%, trigger will be activated on the transaction day when NAV moves to 12.10 (i.e. 10% more than Rs 11/-) or more.

Trigger facility shall be activated after 7 calendar days of the receipt of trigger request. A trigger once activated will not be reactivated in any other plan/ scheme where the Switch happens or in the same plan which retains a part of the value or in case of normal redemption /switch before the trigger is activated. Triggers will be deactivated on redemption and/or switch and/or pledge of units.

Trigger, thus, acts as a financial planning tool and enables the investor to minimize the losses and timely book profits.

NAVs of the schemes are declared at the close of the business day and hence Value of the unit holders unit holdings based on the end of day NAV will be considered as a base for activating the triggers. Accordingly, all the redemptions/ switches etc will be done on the following transaction day on which the event occurs.

Please note that trigger is an additional facility provided to the unit holders to save the time for completing the redemption/ switch formalities on happening of a particular event. Trigger is not to be conceived as an assurance on part of the Fund that the investor will manage to receive a particular sum of money/ appreciation/ and/ or fixed % of sum. Trigger is an event on happening of which the Fund will automatically redeem/ switch units on behalf of the investor on the date of happening of the event. In actual parlance, a trigger will activate an automatic transaction when the event selected for has reached a value greater or less that the specified value (trigger point).

Trigger request is required to be given per transaction by filling in the relevant form. In the event of multiple triggers for a particular transaction, the trigger request will be considered invalid and rejected.

RMF / RNAM reserve the right to introduce, change, modify or withdraw the features available in this facility from time to time.

Note: It may be noted that all the withdrawal/ switch of units to Reliance Gold Savings Fund have been termed as Reliance Golden Trigger with effect from May 21, 2011. All other features under these facilities remain unchanged.

<td>The Units can be redeemed at the Redemption Price. A Unitholder has the option to request for a redemption either by amount (in Rupees) or by number of Units. If the redemption request indicates both amount (in Rupees) and number of Units, the latter will be considered. Where a Rupee amount is specified or deemed to be specified for redemption, the number of Units redeemed will be the amount redeemed divided by the Redemption Price. Alternatively, a unitholder can request closure of his account, in which case, the entire unit balance lying to the credit of his account will be redeemed. The number of Units so redeemed will be subtracted from the unitholder’s account balance and a statement to this effect will be issued to the unitholder. In case the balance in unitholder’s account does not cover the amount of redemption request the Fund may close the unitholder’s account and send the entire such (lesser) balance to the unitholders. If an investor has purchased Units on more than one working day, the Units purchased prior in time (i.e. those Units which have been held for the longest period of time), will be deemed to have been redeemed first, i.e. on a First In First Out Basis. In all the above cases (i.e., rejection/partial processing), intimation will be sent to the investor accordingly. Whenever a redemption/switch/ Various transaction request is rejected then an investor needs to submit a fresh request for reprocessing the same. Units which are not redeemed /switched out on account of the request being rejected due to non realization of funds, will be processed only upon confirmation of realization status and submission of a fresh redemption/switch request for such transactions. The transaction slip can be used by the investor to make a redemption or Inter scheme Switch or Inter plan Switch or Inter Option Switch by entering the requisite details in the transaction slip and submitting the same at the Designated Investor Service Centre. Know Your Client (KYC) Norms

D. COMPUTATION OF NAV

The Net Asset Value (NAV) of the Units will be determined daily or as prescribed by the Regulations. The NAV shall be calculated in accordance with the following formula, or such other formula as may be prescribed by SEBI from time to time.

\]

Example: If the applicable NAV is Rs. 100.00, sales/entry load if any is 2 per cent and the exit/repurchase load is 2 percent then the sales price will be Rs. 102.00 and the repurchase price will be Rs. 98.00

Rounding off policy for NAV

| Value of Investment at end of 1 year (After Expenses) | 110,940.00                              |

Note: Please note that the above is an approximate illustration of the impact of expense ratio on the returns, where the Gross NAV has been simply reduced to the extent of the expenses. In reality, the actual impact would vary depending on the path of returns over the period of consideration. Expenses will be charged on daily net assets.

These estimates have been made in good faith as per the information available to the Investment Manager based on past experience but the total expenses shall not exceed the limits permitted by SEBI. Types of expenses charged shall be as per the SEBI (MF) Regulations. The purpose of the above table is to assist the investor in understanding the various costs and expenses that an investor in the scheme will bear directly or indirectly.

Mutual funds /AMCs may charge Goods & Service Tax on investment and advisory fees to the scheme in addition to the maximum limit as prescribed in regulation 52 of the SEBI Regulations.

Goods & Service Tax on other than investment and advisory fees, if any, shall be borne by the scheme within the maximum limit as per regulation 52 of the SEBI Regulations.
Mutual Funds/AMCs will annually set apart at least 2 basis points on daily net assets within the maximum limit as per regulation 52 of the SEBI Regulations for investor education and awareness initiatives.

Direct Plan shall have a lower expense ratio excluding distribution expenses, commission, and no commission shall be paid from such plan. However, no Investment Management fees would be charged on RNAM’s investment in the Scheme. The Trustee Company, shall be entitled to receive a sum computed @ 0.05% of the Unit Capital of all the Schemes of RMF on 1st April each year or a sum of Rs.5,00,000/- which ever is lower or such other sum as may be agreed from time to time in accordance with the SEBI Regulations or any other authority, from time to time.

The total expenses of the scheme including the investment management and advisory fee shall not exceed the limits stated in Regulation 52(6) which are as follows:

(i) On the first Rs. 100 crore of the daily net assets 2.25%;
(ii) On the next Rs. 300 crore of the daily net assets 2.00%;
(iii) On the next Rs. 300 crore of the daily net assets 1.75%;
(iv) On the balance of the assets 1.50%;

The above expenses are fungible within the overall maximum limit prescribed under SEBI (Mutual Funds) Regulations, 1996, which means there will be no internal sub-limits on expenses and AMC is free to allocate them within the overall TER.

In addition to the limits specified in regulation 52(6), the following costs or expenses may be charged to the scheme as per new sub regulation 6A, namely-

(a) Brokerage and Transaction costs incurred for the execution of trades may be capitalized to the extent of 0.12 per cent of the value of trades in case of cash market transactions and 0.05 per cent of the value of trades in case of derivatives transactions. Any payment towards brokerage and transaction costs incurred for the execution of trades, over and above the said 0.12 per cent and 0.05 per cent for cash market transactions and derivatives transactions respectively may be charged to the scheme within the maximum limit of Total Expense Ratio (TER) as prescribed under Regulation 52 of the SEBI (Mutual Funds) Regulations, 1996. Any expenditure in excess of the said prescribed limit (including brokerage and transaction costs, if any) shall be borne by the AMC or by the Trustee or Sponsors;

(b) expenses not exceeding of 0.30 per cent of daily net assets, if the new inflows from such cities as specified by the Board from time to time are at least -
   (i) 30 per cent of gross new inflows in the scheme, or;
   (ii) 15 per cent of the average assets under management (year to date) of the scheme, whichever is higher:

Provided that if inflows from such cities is less than the higher of sub-clause (i) or sub-clause (ii), such expenses on daily net assets of the scheme shall be charged on proportionate basis:

Provided further that expenses charged under this clause shall be utilised for distribution expenses incurred for bringing inflows from such cities.

Provided further that amount incurred as expense on account of inflows from such cities shall be credited back to the scheme in case the said inflows are redeemed within a period of one year from the date of investment;

The Fund will strive to reduce the level of these expenses so as to keep them well within the maximum limits allowed by SEBI. Expenses on an ongoing basis will not exceed the percentage of the daily net assets or such maximum limits as may be specified by SEBI Regulations from time to time.

The recurring expenses incurred in excess of the limits specified by SEBI (MF) Regulations will be borne by the AMC or by the Trustee or the Sponsor.

In terms of the SEBI [Mutual Fund] Regulations, 1996 (as amended from time to time), the mutual fund schemes are permitted to invest in securitized debt. Accordingly, investments in certain Pass Through Certificates (“PTC’s”) of a securitization trust (“the Trust”) were made through some of schemes of Reliance Mutual Fund (“the Fund”). The returns filed by few of these securitisation Trusts whose PTCs were held by the Fund were taken up for scrutiny by the Income Tax Authorities which raised demand initially on the Trusts. However, on failure to recover, the Income Tax Authorities sent the demand notices to the Fund for Assessment Years 2009-10 and 2010-11. The Fund in consultation with its tax & legal advisors has contested the applicability of such demand and proceedings there on are still pending. It may be noted that this is a matter, which is not restricted only to the Fund but is an industry issue. Accordingly, through the Association of Mutual Funds in India (AMFI), the matter has also been appropriately escalated to the Ministry of Finance, in order to seek necessary clarifications, relief and if required, to carry out necessary amendments to the relevant provisions of the Income Tax Act, 1961. In addition to the above the AMC is party to certain litigations in various courts, commissions etc. which are in ordinary course of business & have no material impact.
