I – INTRODUCTION

A. RISK FACTORS

I. Standard Risk Factors

a) Mutual Funds and securities investments are subject to market risks such as trading volumes, settlement risk, liquidity risk and default risk including the possible loss of principal and there is no assurance or guarantee that the objectives of the Scheme will be achieved.

b) As the price / value / interest rates of the securities in which the scheme invests fluctuates, the value of your investment in the scheme may go up or down.

c) Past performance of the Sponsor/AMC/Mutual Fund does not guarantee future performance of the scheme.

d) Reliance Japan Equity Fund is only the name of the Scheme and does not in any manner indicate either the quality of the scheme or its future prospects and returns.

e) The Sponsor is not responsible or liable for any loss resulting from the operation of the Scheme beyond their initial contribution of Rs. 1 lakh made by it towards the setting up of the Mutual Fund and such other accrretions and additions to the corpus.

f) The present scheme is not a guaranteed or assured return scheme.

g) The Mutual Fund is not guaranteeing or assuring any dividend. The Mutual Fund is also not assuring that it will make periodical Dividend distributions, though it has every intention of doing so. All Dividend distributions are subject to the availability of distributable surplus of the Scheme.

h) The Sponsor, their affiliates, associates, subsidiaries, the Mutual Fund and the AMC may invest directly or indirectly in the Scheme, over a period of time; subject to the SEBI (Mutual Funds) Regulations. These entities may acquire a substantial portion of the Scheme’s Units and collectively constitute a major investor in the Scheme. Accordingly, Redemption of Units held by such entities may have an adverse impact on the Scheme because the timing of such Redemption may impact the ability of other Unit holders to Redeem their Units.

i) Different types of Securities in which the Scheme would invest as given in this Scheme Information Document carry different levels and types of risks. Accordingly, the Scheme’s risk may increase or decrease depending upon its investment pattern. For example, equity and equity related securities carry a higher amount of risk than debt securities. Investment decisions made by the AMC may not always be profitable.

II. Scheme Specific Risk Factors

1. Currency movements:

Since these investments will be made in a different currency (the JPY), their value will be dependent on currency movements of the JPY vis-a-vis the INR, which in turn may be determined or influenced by a host of factors like the relative strength of the INR vis-a-vis other currencies, the relative strength of the JPY vis-a-vis other currencies, relative current and future interest rates, domestic economic and political developments and government actions both in Japan and in India, and trade and invest flows between Japan and India, among other things. These currency movements may reduce or even wipe out gains made on the market in Japan as investments would be denominated in JPY whereas Net Asset Values would be denominated in INR and purchases and redemptions of units would also take place in INR. Generally, a strengthening of the INR vis-a-vis the JPY (i.e. less INR per JPY) would lead to reduction in NAV in INR terms, other things remaining the same.

To manage risks associated with the portfolio, foreign currency and interest rate exposure, the Fund may use / invest in derivatives for efficient portfolio management including hedging and in accordance with the conditions as may be stipulated by SEBI / RBI. The Fund also hereby avers that offshore investments shall be made subject to any / all approvals, as well as the conditions thereof as may be stipulated by SEBI / RBI and provided such investments do not result in expenses to the fund in excess of the ceiling, if any, on the expenses prescribed by SEBI. However, no assurance can be given that the hedging objectives will be achieved. The hedging strategy may also substantially limit Unit holders from benefiting if the currencies move in the opposite direction. Additionally, Unit holders may be exposed to fluctuations in the NAV caused by fluctuations in the mark-to-market value of derivative instruments, in the rare event where such instruments do not move in tandem to underlying JPY-INR rates (known as ‘basis’ risk).

Appointment of advisors:

The Fund may, where necessary, appoint advisor(s) for providing advisory services for such Scheme’s investments. The appointment of such advisor(s) shall be in accordance with the applicable requirements of SEBI. The fees and expenses would illustratively include, besides the investment management fees, custody fees and costs, transaction costs and overseas regulatory costs, the fees of appointed advisor(s). The fees related to these services would be borne by the AMC and would not be charged to the Scheme.

2. Risks related to Taxation

Since these investments will be made in the Japan, they will be subject to taxation laws of the Japan and changes therein. Hence, the taxation rules that apply at the time of making the investment may change when investments are exited and the scheme may be subject to a higher level of taxes than originally anticipated. The continuance of assessments may also impact the AMC’s ability to repatriate funds relating to the scheme from Japan to India.

3. Liquidity Risk

Trading volumes, settlement periods and transfer procedures may restrict the liquidity of the investments made by the Scheme. Securities, which are not quoted on the stock exchanges, are inherently illiquid in nature and carry a larger amount of liquidity risk. Within the Regulatory limits, the AMC may choose to invest in unlisted securities that offer attractive yields. This may however increase the risk of the portfolio. However, the Scheme will endeavour to maintain a proper asset-liability match to ensure redemption payments are made on time and not affected by illiquidity of the underlying investments.
The liquidity of the Scheme and its ability to meet redemptions would also be adversely affected if the date of redemption is a working day in India and a holiday in Japan (i.e. markets are closed in Japan)

The repatriation of capital / income to India may also be hampered by changes in regulations concerning exchange controls or political circumstances as well as the application to it of other restrictions on investment. The Scheme will be assessed to applicable taxes on incomes / gains from such investments, which may also restrict its ability to repatriate funds to India.

4. Market risks

Investors may note that AMC/Fund Manager’s investment decisions may not be always profitable.

Although the AMC intends to generate capital appreciation and maximize the returns by actively investing in appropriate securities, given the nature of the Scheme, the investments in this scheme would be exposed to regulatory, economic and political changes in Japan, which may be more difficult to predict and react to remotely by a fund manager in India (given differences in time zone and relative media coverage) than by a fund manager present in the country of investment (the Japan in this case).

The Scheme and its investors could also face settlement and liquidity risks that are unique to the Japan markets, given local laws and market practices.

5. Risks associated with investing in Equities

The Scheme being an equity scheme will be affected by the risks associated with the equity market.

Equity and Equity related instruments on account of its volatile nature are subject to price fluctuations on daily basis. The volatility in the value of the equity and equity related instruments is due to various micro and macro economic factors affecting the securities markets. This may have adverse impact on individual securities /sector and consequently on the NAV of Scheme.

The inability of the Scheme to make intended securities purchases due to settlement problems, could cause the Scheme to miss certain investment opportunities as in certain cases, settlement periods may be extended significantly by unforeseen circumstances. Similarly, the inability to sell securities held in the schemes portfolio may result, at times, in potential losses to the scheme, should there be a subsequent decline in the value of the securities held in the schemes portfolio.

Trading volumes, settlement periods and transfer procedures may restrict the liquidity of the investments. This may impact the ability of the unit holders to redeem their units. In view of this, the Trustee has the right, in its sole discretion to limit redemptions (including suspending redemptions) under certain circumstances.

The AMC may invest in unlisted securities that offer attractive yields within the regulatory limit. This may however increase the risk of the portfolio as these unlisted securities are inherently illiquid in nature and carry larger liquidity risk as compared to the listed securities or those that offer other exit options to the investors.

Investments in equity and equity related securities involve high degree of risks and investors should not invest in the Scheme unless they can afford to take the risk of losing their investment.

6. Risks associated with Fixed Income Securities (Bond investments)

Indian Fixed Income Securities (Bond investments)

Investment in Debt is subject to price, credit, and interest rate risk.

The NAV of the Scheme may be affected, inter alia, by changes in the market conditions, interest rates, trading volumes, settlement periods and transfer procedures.

Corporate debt securities are subject to the risk of an issuer’s inability to meet interest and principal payments on its debt obligations (credit risk). Debt securities may also be subject to price volatility due to factors such as changes in interest rates, general level of market liquidity and market perception of the creditworthiness of the issuer, among others (market risk). The Investment Manager will endeavor to manage credit risk through in-house credit analysis. The Scheme may also use various hedging products from time to time, as are available and permitted by SEBI, to attempt to reduce the impact of undue market volatility on the Scheme’s portfolio.

The NAV of the Scheme’s Units, to the extent that the Scheme is invested in fixed income securities, will be affected by changes in the general level of interest rates. When interest rates decline, the value of a portfolio of fixed income securities can be expected to rise. Conversely, when interest rates rise, the value of a portfolio of fixed income securities can be expected to decline.

Investing in Bonds and Fixed Income securities are subject to the risk of an Issuer’s inability to meet principal and interest payments obligation (credit risk) and may also be subject to price volatility due to such factors as interest rate sensitivity, market perception of the creditworthiness of the issuer and general market liquidity (market risk).

The pricing of transactions in debt obligations, which will often depend on the pricing of the Purchases and Redemptions in the Scheme, may result in capital appreciation or depreciation because the value of debt obligations generally varies inversely with the prevailing interest rates.

Interest Rate Risk: As with all debt securities, changes in interest rates will affect the Scheme’s Net Asset Value as the prices of securities generally increase as interest rates decline and generally decrease as interest rates rise. Prices of longer-term securities generally fluctuate more in response to interest rate changes than do shorter-term securities. Interest rate movements in the Indian debt markets can be volatile leading to the possibility of large price movements up or down in debt and money market securities and thereby to possibly large movements in the NAV.

Liquidity or Marketability Risk: This refers to the ease at which a security can be sold at or near its true value. The primary measure of liquidity risk is the spread between the bid price and the offer price quoted by a dealer. Liquidity risk is characteristic of the Indian fixed income market.
Credit Risk: Credit risk or default risk refers to the risk which may arise due to default on the part of the issuer of the fixed income security (i.e. will be unable to make timely principal and interest payments on the security). Because of this risk debentures are sold at a yield spread above those offered on Treasury securities, which are sovereign obligations and generally considered to be free of credit risk. Normally, the value of a fixed income security will fluctuate depending upon the actual changes in the perceived level of credit risk as well as the actual event of default.

Reinvestment Risk: This risk refers to the interest rate levels at which cash flows received from the securities in the Scheme or from maturities in the Scheme are reinvested. The additional income from reinvestment is the “interest on interest” component. The risk refers to the fall in the rate for reinvestment of interim cashflows.

Different types of securities in which the scheme would invest as given in the Scheme Information Document carry different levels and types of risk. Accordingly, the scheme’s risk may increase or decrease depending upon its investment pattern e.g. corporate bonds, carry a higher level of risk than Government securities. Further even among corporate bonds, bonds which are AAA rated are comparatively less risky than bonds which are AA rated.

7. Risks associated with investment in ADR/GDR

Investments in ADRs/GDRs/overseas securities offer new investment and portfolio diversification opportunities into multi-market and multi-currency products. However, such investments also entail additional risks. They may not reflect the market / intrinsic value of their underlying shares and may become illiquid because of restrictions on conversion to the underlying shares (fungibility).

8. Risk associated with investing in Derivatives

Valuation Risk
The risk in valuing the Debt & Equity derivative products due to inadequate trading data with good volumes. Derivatives with longer duration would have higher risk viz a viz the shorter duration derivatives.

Mark to Market Risk
The day-to-day potential for an investor to experience losses from fluctuations in underlying stock prices and derivatives prices.

Systematic Risk
The risk inherent in the capital market due to macro economic factors like Inflation, GDP, Global events.

Liquidity Risk
The risk stemming from the lack of availability of derivatives products across different maturities and with different risk appetite.

Implied Volatility
The estimated volatility of an underlying security’s price and derivatives price.

Interest Rate Risk
The risk stemming from the movement of Interest rates in adverse direction. As with all the debt securities, changes in the interest rates will affect the valuation of the portfolios.

Counterparty Risk (Default Risk)
Default risk is the risk that losses will be incurred due to the default by the counterparty for over the counter derivatives.

System Risk
The risk arising due to failure of operational processes followed by the exchanges and OTC participants for the derivatives trading.

Risk attached with the use of derivatives

Derivative products are leveraged instruments and can provide disproportionate gains as well as disproportionate losses to the investor. Execution of such strategies depends upon the ability of the fund manager to identify such opportunities. Identification and execution of the strategies to be pursued by the fund manager involve uncertainty and decision of fund manager may not always be profitable. No assurance can be given that the fund manager will be able to identify or execute such strategies.

The risks associated with the use of derivatives are different from or possibly greater than, the risks associated with investing directly in securities and other traditional investments. RNAM may use various derivative products, from time to time, for purposes of hedging and portfolio rebalancing in an attempt to protect the value of the portfolio and enhance Unit holder’s interest of the Scheme. As and when the schemes trade in the derivatives market there are risk factors and issues concerning the use of derivatives that investors
should understand derivative products are specialized instruments that require investment techniques and risk analyses different from those associated with stocks and bonds. The use of a derivative requires an understanding not only of the underlying instrument but also of the derivative itself. Derivatives require the maintenance of adequate controls to monitor the transactions entered into, the ability to assess the risk that a derivative adds to the portfolio and the ability to forecast price or interest rate movements correctly. There is the possibility that a loss may be sustained by the portfolio as a result of the failure of another party (usually referred to as the “counter party”) to comply with the terms of the derivatives contract. Other risks in using derivatives include the risk of mispricing or improper valuation of derivatives and the inability of derivatives to correlate perfectly with underlying assets, rates and indices. Thus, derivatives are highly leveraged instruments. Even a small price movement in the underlying security could have a large impact on their value. Also, the market for derivative instruments is nascent in India.

Regulatory Restriction:

In terms of prevailing SEBI guidelines on overseas investment, each mutual fund is currently permitted to invest in foreign securities up to US$300 million irrespective of the size of the assets. The ceiling for investment in overseas ETFs that invest in securities is US$ 50 million per mutual fund. The investments shall be made in line with the said limits or any modified limits as specified by SEBI from time to time. If these limits are exhausted, then further subscriptions will not be accepted into this Scheme.

As of July 2014, RMF’s limit to invest in foreign securities is US$600 mn and the ceiling for investments in overseas ETF is US$ 100 mn.

9. Other Scheme Specific Risk factors

(i) The liquidity of the Scheme’s investments may be inherently restricted by trading volumes, settlement periods and transfer procedures. In the event of an inordinately large number of redemption requests, or of a re-structuring of the Scheme’s investment portfolio, these periods may become significant. Please read the Sections of this Scheme Information Document entitled “Special Considerations” and “Right to Limit Redemptions” thereunder.

(ii) Although, the objective of the Fund is to generate optimal returns, the objective may or may not be achieved. The investors may note that if the AMC/Investment Manager is not able to make right decision regarding the timing of increasing exposure in debt securities in times of falling equity market, it may result in negative returns. Given the nature of scheme, the portfolio turnover ratio may be on the higher side and the AMC may change the full portfolio commensurate with the investment decisions and Asset Allocation of the Scheme. At times, such churning of portfolio may lead to losses due to subsequent negative or unfavorable market movements.

(iii) The tax benefits described in this Scheme Information Document are as available under the present taxation laws and are available subject to relevant conditions. The information given is included only for general purpose and is based on advise received by the AMC regarding the law and practice currently in force in India and the Unit holders should be aware that the relevant fiscal rules or their interpretation may change. As is the case with any investment, there can be no guarantee that the tax position or the proposed tax position prevailing at the time of an investment in the Scheme will endure indefinitely. In view of the individual nature of tax consequences, each Unit holder is advised to consult his / her own professional tax advisor.

(iv) The AMC carries out valuation of investments made by the Scheme. The AMC values Securities and assets in the Scheme according to the valuation policies described in the Statement of Additional Information.

B. REQUIREMENT OF MINIMUM INVESTORS IN THE SCHEME

The Scheme/Plan shall have a minimum of 20 investors and no single investor shall account for more than 25% of the corpus of the Scheme/Plan(s). However, if such limit is breached during the NFO of the Scheme, the Fund will endeavor to ensure that within a period of three months or the end of the succeeding calendar quarter from the close of the NFO of the Scheme, whichever is earlier, the Scheme complies with these two conditions. In case the Scheme / Plan(s) does not have a minimum of 20 investors in the stipulated period, the provisions of Regulation 39(2)(c) of the SEBI (MF) Regulations would become applicable automatically without any reference from SEBI and accordingly the Scheme / Plan(s) shall be wound up and the units would be redeemed at applicable NAV. The two conditions mentioned above shall also be complied within each subsequent calendar quarter thereafter, on an average basis, as specified by SEBI. If there is a breach of the 25% limit by any investor over the quarter, a rebalancing period of one month would be allowed and thereafter the investor who is in breach of the rule shall be given 15 days notice to redeem his exposure over the 25 % limit. Failure on the part of the said investor to redeem his exposure over the 25 % limit within the aforesaid 15 days would lead to automatic redemption by the Mutual Fund on the applicable Net Asset Value on the 15th day of the notice period. The Fund shall adhere to the requirements prescribed by SEBI from time to time in this regard.

C. SPECIAL CONSIDERATIONS, IF ANY

1. Income Distribution

The Mutual Fund is not assuring or guaranteeing that it will be able to make regular periodical distributions units to its Unit holders though it has every intention to manage the portfolio so as to make periodical income distributions to Unit holders. Periodical distributions will be dependent on the returns achieved by the Asset Management Company through the active management of the portfolio. Periodical distributions may therefore vary from period to period, based on investment results of the portfolio.

2. Right to limit Purchase of units and/or Right to limit Redemption of units

The Trustee and AMC may, in the general interest of the Unit holders of the Scheme under this Scheme Information Document and keeping in view the unforeseen circumstances / unusual market conditions, limit the total number of Units which may be redeemed on any Working Day for redemption requests of more than Rs. 2 Lakhs per folio at a scheme level. In line with the SEBI Circular dated May 31, 2016 the following conditions would be applicable.

a. Restriction may be imposed when there are circumstances leading to a systemic crisis or event that severely constrains market liquidity or the efficient functioning of markets such as:

i. Liquidity issues - when market at large becomes illiquid and affecting almost all securities.

ii. Market failures, exchange closures - when markets are affected by unexpected events which impact the functioning of exchanges or the regular course of transactions. Such unexpected events could also be related to political, economic, military, monetary or other emergencies.
iii. Operational issues – when exceptional circumstances are caused by force majeure, unpredictable operational problems and technical failures (e.g. a black out).

b. Restriction on redemption may be imposed for a specified period of time not exceeding 10 working days in any 90 days period.

c. When restriction on redemption is imposed, the following procedure shall be applied:

i. No redemption requests upto INR 2 lakh shall be subject to such restriction.

ii. Where redemption requests are above INR 2 lakh, AMCs shall redeem the first INR 2 lakh without such restriction and remaining part over and above INR 2 lakh shall be subject to such restriction.

However, suspension or restriction of redemption under any scheme of the Mutual Fund shall be made applicable only after the approval from the Board of Directors of the Asset Management Company and the Trustee Company. The approval from the AMC Board and the Trustees giving details of circumstances and justification for the proposed action shall also be informed to SEBI immediately.

3. Suspension of Purchase and Redemption of Units

The purchase and/or redemption of Units may be suspended with prior approval of Trustees and Asset Management Company giving the details of circumstances and justification for the proposed action shall also be informed to SEBI in advance, temporarily or indefinitely when any of the following conditions exist at one/more Designated Investor Service Center’s:

f) In the event of breakdown in the means of communication used for the valuation of investments of the Scheme, without which the value of the securities cannot be accurately calculated.

g) In the event of any force majeure or disaster that affects the normal functioning of the AMC or the designated investor service centers.

h) SEBI, by order, so directs.

i) RMF also reserves the right at its sole discretion to withdraw sale of Units in the Scheme temporarily or indefinitely, if the AMC views that increasing the Scheme’s size further may prove detrimental to the existing unit holders of the Scheme. An order/ request to purchase Units is not binding on and may be rejected by the Trustee, the AMC or their respective agents, unless it has been confirmed in writing by the AMC or its agents and (or) payment has been received.

The investment strategy of the fund would be to create a portfolio of companies which are leaders or potential leaders in the growth oriented sectors of Japan and are listed on recognized stock exchanges of Japan.

The investment philosophy would be a blend of top down and bottom up approach without any extreme sector bias. The sectors would be mainly assessed on their growth potential in the mid and long term. On the other hand, companies within the selected sectors would be analyzed taking into account the business fundamentals like nature and stability of business, potential for future growth and scalability, sales volume, earning performance, corporate image, company's financial strength and track record etc.

The fund will endeavor to follow a disciplined investment approach and the portfolio will be reviewed & rebalanced at regular intervals, whenever deemed necessary.

The investments in debt instruments carry various risks like interest rate risk, liquidity risk, default risk, purchasing power risk etc. While they cannot be done away with, they can be minimized by diversification and effective use of hedging techniques. Investment views / decisions will be taken on the basis of the following parameters:

1. Prevailing interest rate scenario
2. Quality of the security / instrument (including the financial health of the issuer)
3. Liquidity/Maturity profile of the instrument
4. Any other factors in the opinion of the fund management team

The Fund may, where necessary, appoint advisor(s) for providing advisory services for such Scheme’s investments. The appointment of such advisor(s) shall be in accordance with the applicable requirements of SEBI. The fees and expenses would illustratively include, besides the investment management fees, custody fees and costs, transaction costs and overseas regulatory costs, the fees of appointed advisor(s). The fees related to these services would be borne by the AMC and would not be charged to the Scheme.

Risk Mitigation Factor / Risk Control:

It is AMC’s belief that the investment in ADRs/GDRs/overseas securities offer new investment and portfolio diversification opportunities into multi-market and multi-currency products. However, such investments also entail additional risks. Such investment opportunities may be pursued by the AMC provided they are considered appropriate in terms of the overall investment objectives of the Scheme. Since the Scheme invests in ADRs/ GDRs/overseas securities, there may not be readily available and widely accepted benchmarks to measure performance of the Scheme.

To the extent that the assets of the Scheme will be invested in securities denominated in foreign currencies, the Indian Rupee equivalent of the net assets, distributions and income may be adversely affected by the changes in the value of certain foreign currencies relative to the Indian Rupee. The repatriation of capital also may be hampered by changes in regulations concerning exchange controls or political circumstances as well as the application to it of the other restrictions on investment.

Overseas investments will be made subject to any/all approvals, conditions thereof as may be stipulated by SEBI/RBI and provided such investments do not result in expenses to the Scheme in excess of the ceiling on expenses prescribed by and consistent with costs and expenses attributed to international investing.

Debt Market In India

The Indian Debt market is facing major shift in the recent times. The substantial growth in Mutual Fund collections in the past few years have provided an easy route for the investors to channelise their savings into the debt market, which otherwise is largely dominated by Banks and other Institutional investors.

At present, the Indian debt market is dominated by issues of Central Government bonds, Corporate Debentures and PSU Bonds. The new Securitised instruments are also very attractive in the primary market. Risk associated with securitized Debt or PTCs are credit risk, liquidity risk and price risk/interest rate risk. The other instruments available for investment are Commercial Papers, Certificate of Deposits, Government guaranteed bonds, etc.

Brief details about the instruments are given below as on March 1, 2019.

THE PRICE AND YIELD ON VARIOUS DEBT INSTRUMENTS FLUCTUATE FROM TIME TO TIME DEPENDING UPON THE MACRO ECONOMIC SITUATION, INFLATION RATE, OVERALL LIQUIDITY POSITION, FOREIGN EXCHANGE SCENARIO, ETC. ALSO, THE PRICE AND YIELD VARIES ACCORDING TO MATURITY PROFILE, CREDIT RISK ETC
TRADING IN DERIVATIVES

The Scheme may take derivatives position based on the opportunities available subject to the guidelines issued by SEBI from time to time and in line with the overall investment objective of the Scheme. These may be taken to hedge the portfolio, rebalance the same or to undertake any other strategy as permitted under the SEBI Regulations.

The following information provides a basic idea as to the nature of the derivative instruments proposed to be used by the Fund and the benefits and risks attached there with.

i) Interest Rate Swaps and Forward rate Agreements

Benefits

Bond markets in India are not very liquid. Investors run the risk of illiquidity in such markets. Investing for short-term periods for liquidity purposes has its own risks. Investors can benefit if the Fund remains in call market for the liquidity and at the same time take advantage of fixed rate by entering into a swap. It adds certainty to the returns without sacrificing liquidity.

Illustration

The following are illustrations how derivatives work:

Basic Structure of an Interest Rate Swap

<thead>
<tr>
<th>Counter Party 1</th>
<th>Floating Interest Rate</th>
<th>Counter Party 2</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>Fixed Interest Rate</td>
<td></td>
</tr>
</tbody>
</table>

In the above illustration, Basic Details: Fixed to floating swap
Notional Amount: Rs. 5 Crores
Benchmark: NSE MIBOR
Deal Tenor: 3 months (say 91 days)
Documentation: International Swaps and Derivatives Association (ISDA).

Let us assume the fixed rate decided was 10%.

At the end of three months, the following exchange will take place:

Counter party 1 pays: compounded call rate for three months, say 9.90%
Counter party 2 pays fixed rate: 10%

In practice, however, the difference of the two amounts is settled. Counter party 2 will pay:

Rs 5 Crores *0.10%* 91/365 = Rs. 12,465.75

Thus the trade off for the Fund will be the difference in call rate and the fixed rate payment and this can vary with the call rates in the market.

Please note that the above example is given for illustration purposes only and the actual returns may vary depending on the terms of swap and market conditions.

ii) Index Futures:

Benefits

a) Investment in Stock Index Futures can give exposure to the index without directly buying the individual stocks. Appreciation in Index stocks can be effectively captured through investment in Stock Index Futures.

b) The Fund can sell futures to hedge against market movements effectively without actually selling the stocks it holds.

The Stock Index futures are instruments designed to give exposure to the equity market indices. The Stock Exchange, Mumbai and The National Stock Exchange have started trading in index futures of 1, 2 and 3-month maturities. The pricing of an index future is the function of the underlying index and interest rates.

Illustration

Spot Index: 1070
1 month Nifty Future Price on day Rs. 1: 1075
Fund buys 100 lots
Each lot has a nominal value equivalent to 200 units of the underlying index
Let us say that on the date of settlement, the future price = Closing spot price = Rs. 1085
Profits for the Fund = (Rs. 1085-Rs. 1075)* 100 lots * 200 = Rs 200,000

Please note that the above example is given for illustration purposes only.

The net impact for the Fund will be in terms of the difference between the closing price of the index and cost price (ignoring margins for the sake of simplicity). Thus, it is clear from the example that the profit or loss for the Fund will be the difference of the closing price (which can be higher or lower than the purchase price) and the purchase price. The risks associated with index futures are similar to the one with equity investments. Additional risks could be on account of illiquidity and hence mispricing of the future at the time of purchase

iii) Buying Options:

Benefits of buying a call option:

Buying a call option on a stock or index gives the owner the right, but not the obligation, to buy the underlying stock / index at the designated strike price. Here the downside risks are limited to the premium paid to purchase the option.

Illustration

For example, if the fund buys a one-month call option on Satyam Computers at a strike of Rs. 150, the current market price being say Rs.151. The fund will have to pay a premium of say Rs. 15 to buy this call. If the stock price goes below Rs. 150 during the tenure of the call, the fund
avoids the loss it would have incurred had it straightaway bought the stock instead of the call option. The fund gives up the premium of Rs. 15 that has to be paid in order to protect the fund from this probable downside. If the stock goes above Rs. 150, it can exercise its right and own Satyam Computers at a cost price of Rs. 150, thereby participating in the upside of the stock.

**Benefits of buying a put option**

Buying a put option on a stock originally held by the buyer gives him/her the right, but not the obligation, to sell the underlying stock at the designated strike price. Here the downside risks are limited to the premium paid to purchase the option.

**Illustration**

For example, if the fund owns Satyam computers and also buys a three month put option on Satyam Computers at a strike of Rs. 150, the current market price being say Rs.151. The fund will have to pay a premium of say Rs. 12 to buy this put. If the stock price goes below Rs. 150 during the tenure of the put, the fund can still exercise the put and sell the stock at Rs. 150, avoiding therefore any downside on the stock below Rs. 150. The fund gives up the fixed premium of Rs. 12 that has to be paid in order to protect the fund from this probable downside. If the stock goes above Rs. 150, say to Rs. 170, it will not exercise its option. The fund will participate in the upside of the stock, since it can now sell the stock at the prevailing market price of Rs. 170.

The Scheme will comply with provisions specified in SEBI Circular No. Cir/IMD/DF/11/2010 dated August 18, 2010 related to overall exposure limits as stated below:

(i) The cumulative gross exposure through equity, debt and derivative positions should not exceed 100% of the net assets of the scheme.

(ii) Mutual Funds shall not write options or purchase instruments with embedded written options.

(iii) The total exposure related to option premium paid must not exceed 20% of the net assets of the scheme.

(iv) Cash or cash equivalents with residual maturity of less than 91 days may be treated as not creating any exposure.

(v) Exposure due to hedging positions may not be included in the above mentioned limits subject to the following:

   a. Hedging positions are the derivative positions that reduce possible losses on an existing position in securities and till the existing position remains.

   b. Hedging positions cannot be taken for existing derivative positions. Exposure due to such positions shall have to be added and treated under limits mentioned in Point (i).

   c. Any derivative instrument used to hedge has the same underlying security as the existing position being hedged.

   d. The quantity of underlying associated with the derivative position taken for hedging purposes does not exceed the quantity of the existing position against which hedge has been taken.

(vi) Exposure due to derivative positions taken for hedging purposes in excess of the underlying position against which the hedging option has been taken, shall be treated under the limits mentioned in point (i).

(vii) Definition of Exposure in case of Derivative Positions: Each position taken in derivatives shall have an associated exposure as defined under. Exposure is the maximum possible loss that may occur on a position. However, certain derivative positions may theoretically have unlimited possible loss. Exposure in derivative positions shall be computed as follows:

<table>
<thead>
<tr>
<th>Position</th>
<th>Exposure</th>
</tr>
</thead>
<tbody>
<tr>
<td>Long Future</td>
<td>Futures Price * Lot Size * Number of Contracts</td>
</tr>
<tr>
<td>Short Future</td>
<td>Futures Price * Lot Size * Number of Contracts</td>
</tr>
<tr>

<td>Option Premium Paid * Lot Size * Number of Contracts</td>
</tr>
</tbody>
</table>

(viii) Mutual Funds may enter into plain vanilla interest rate swaps for hedging purposes. The counter party in such transactions has to be an entity recognized as a market maker by RBI. Further, the value of the notional principal in such cases must not exceed the value of respective existing assets being hedged by the scheme. Exposure to a single counterparty in such transactions should not exceed 10% of the net assets of the scheme.

The AMC retains the right to enter into such derivative transactions as may be permitted by the Regulations from time to time. For risks associated with investments in derivatives investors are requested to refer to Scheme Specific Risk Factors of this Scheme Information Document.

The AMC retains the right to enter into such derivative transactions as may be permitted by the applicable regulations from time to time.

**PORTFOLIO TURNOVER POLICY:**

Given the nature of the scheme, the portfolio turnover ratio may be very high and AMC may change the portfolio according to Asset Allocation, commensurate with the investment objectives of the scheme. The effect of higher portfolio turnover could be higher brokerage and transaction costs.

Provided that, the limit of 10% shall not be applicable for investments in index fund or sector/industry specific scheme.

However, the Scheme at any point of time will not invest more than 10% of the NAV of the Scheme in a single company.

15. In case any company has invested more than 5% of the net asset value of a scheme, the investment made by that scheme or by any other scheme of the same Mutual Fund in that company or its subsidiaries, if any, shall be brought to the notice of the Trustees by RNAM and be disclosed in the half-yearly and annual accounts with justification for such investment provided that the latter investment has been made within one year of the date of the former investment calculated on either side.
16. The Scheme may invest in Overseas securities in accordance with the regulations as applicable from time to time.

17. In terms of prevailing SEBI guidelines on overseas investment, each mutual fund is currently permitted to invest in foreign securities up to US$300 million irrespective of the size of the assets. The ceiling for investment in overseas ETFs that invest in securities is US$50 million per mutual fund. The investments shall be made in line with the said limits or any modified limits as specified by SEBI from time to time.

As of July 2014, RMF’s limit to invest in foreign securities is US$600 mn and the ceiling for investments in overseas ETF is US$ 100 mn.

18. The Scheme will comply with any other regulations applicable to the investments of mutual funds from time to time.

19. Aggregate value of ‘illiquid securities’ of the Scheme, which are defined as non-traded, thinly traded and unlisted equity shares, shall not exceed 15% of the total assets of the Scheme.

20. Although the Fund is not restricted in the type of equity and equity related securities that it will purchase, in no case will it ever own more than 5% of the shares in a listed Japanese real estate holding company (that is, a company whose value consists 50% or more of real estate assets in Japan), more than 2% of the shares in a unlisted Japanese real estate holding company (that is, a company whose value consists 50% or more of real estate assets in Japan), taxable derivative transactions, or non-performing loans or other assets that give rise to holding income as defined for Japanese tax purposes.

21. Total exposure of the scheme in a particular sector (excluding investments in Bank CDs, Tri-Party Repo, G-Secs, T-Bills and AAA rated securities issued by Public Financial Institutions and Public Sector Banks and such other instruments if any, as may be specified by SEBI from time to time) shall not exceed 25% or such other percentage of the net assets of the scheme, as prescribed by SEBI from time to time, unless the scheme has specifically been exempted from the requirement by SEBI.

If the total exposure in a particular sector is above 25%, it will be ensured that the total exposure in those sectors shall comply with the aforesaid requirement within a period of one year from the date of issuance of the SEBI Circular dated September 13, 2012. During this one year, total exposure of existing schemes in a particular sector shall not increase from the levels existing (if above 25%) as on the date of issuance of the aforesaid circular.

An additional exposure to financial services sector (over and above the limit of 25%) not exceeding 15% of the net assets of the scheme shall be allowed by way of increase in exposure to Housing Finance Companies (HFCs) rated AA and above and registered with National Housing Bank (NHB). However, such total investment/exposure in HFCs shall not exceed 25% of the net assets of the scheme or such other percentage of the net assets of the scheme, as prescribed by SEBI from time to time.

An example of the sector limit is given: Scheme AUM: Rs 100 Crs. The maximum investment in any particular sector would be Rs. 25 Crs. However in case of Financial Services (including Housing Finance Companies), exposure up to Rs. 40 crores can be taken provided exposure to Housing Finance Companies(HFCs) is not less than Rs.15 Crores. Hence an additional exposure of 15% can be taken to the Financial Services sector only towards exposure to the HFCs. Moreover exposure towards HFCs cannot exceed Rs. 25 Crores.

Note: The sector classification shall be basis the data provided by Association of Mutual Fund in India

22. The Fund shall not borrow except to meet temporary liquidity needs of the Fund for the purpose of repurchase / Redemption of Units or payment of interest and Dividend to the Unitholders.

Provided that the Fund shall not borrow more than 20% of the net assets of any individual Scheme and the duration of the borrowing shall not exceed a period of 6 months.

All the Schemes securities investment will be in transferable securities.

All investment restrictions stated above shall be applicable at the time of making investment.

The Scheme will not enter into any transaction, which exposes it to unlimited liabilities or results in the encumbering of its assets in any way so as to expose them to unlimited liability.

These investment limitations / parameters as expressed / linked to the net asset / net asset value / capital, shall in the ordinary course, apply as at the date of the most recent transaction or commitment to invest. Changes do not have to be effected merely because of appreciation or depreciation in value or by reason of the receipt of any rights, bonuses or benefits in the nature of capital or of any scheme of arrangement or for amalgamation, reconstruction or exchange, or at any repayment or redemption or other reason outside the control of the Fund, any such limits would thereby be breached. If these limits are exceeded for reasons beyond its control, AMC shall adopt as a priority objective the remedying of that situation, taking due account of the interests of the Unitholders.

The Trustee Company in consultation with AMC may alter these above stated limitations from time to time, and also to the extent the Regulations change, so as to permit the Scheme to make its investments in the full spectrum of permitted investments in order to achieve its investment objectives & policies. As such, all investments of the Scheme will be made in accordance with the Regulations including Schedule VII thereof and the Fundamental Attributes of this Scheme.

The investment in Foreign equity Securities shall be in accordance with SEBI Regulations.

At RMF, to ensure robust risk management and adequate portfolio diversification internal Investment policy for various debt schemes has been framed. The investment policy at RMF specifies limits both on overall basis (across all schemes) as well as on individual scheme level.

Guidelines for following parameters for liquid as well as non liquid schemes has been specified in the policy:

1. Eligible Instruments: Defines the eligible instruments where the scheme can invest
2. Minimum Liquidity: Defines the instruments considered as liquid instruments and the minimum investments in these instruments as a percentage of total net assets
3. Maximum Illiquid component: Defines the instruments considered as illiquid and the maximum investment that can be made in these instruments as a percentage of net assets.
4. Rating: Defines minimum and/ or maximum investment in a particular rating as a percentage of total portfolio.
5. Maturity: Defined the weighted average maturity of a portfolio. Also defines the weighted average maturity, maximum and maturity for certain asset types like corporate bond, PTCs, Gilts etc

Investment by the AMC in the Scheme: RNAM reserves the right to invest its own funds in the Scheme up to a maximum extent of its networth. As per SEBI Regulations, such investments are permitted, subject to disclosure being made in the Scheme Information Document. Further, RNAM shall not charge any fees on its investment in the Scheme, unless allowed to do so under SEBI Regulations in the future

<th>The Scheme offers the following Plans:</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>(a) <strong>Growth Plan / Direct Plan - Growth Plan:</strong> The Growth Plan is designed for investors interested in capital appreciation on their investment and not in regular income. Accordingly, the Fund will not declare dividends under the Growth Plan. The income earned on the Growth Plan's corpus will remain invested in the Growth Plan.</td>
</tr>
<tr>
<td></td>
<td>(i) <strong>Growth Option</strong> The Growth Plan has a Growth Option. </tr>
<tr>
<td></td>
<td>(b) <strong>Dividend Plan / Direct Plan – Dividend Plan:</strong> The Dividend Plan has been designed for investors who require regular income in the form of dividends. Under the Dividend Plan, the Fund will endeavor to make regular dividend payments to the unitholders.</td>
</tr>
<tr>
<td></td>
<td>Dividend will be distributed from the available distributable surplus after the deduction of applicable statutory levy, if any.</td>
</tr>
<tr>
<td></td>
<td>Dividend Plan has two options:</td>
</tr>
<tr>
<td></td>
<td>(i) <strong>Dividend Payout Option</strong> Under this option the Dividend declared under the Dividend Plan will be paid to the Unitholders within 30 days from the declaration of the dividend</td>
</tr>
<tr>
<td></td>
<td>(ii) <strong>Dividend Re-investment Option</strong> The Dividend Plan has a Reinvestment Option whereby the dividend distributed under the plan will be automatically reinvested at the ex-dividend NAV on the transaction day following the date of declaration of dividend and additional Units will be allotted accordingly. Investors desirous of opting for the same should indicate the same in the space provided in the application form.</td>
</tr>
</tbody>
</table>

When dividends are declared and paid with respect to the Plan, the net assets attributable to Unit holders will stand reduced by an amount equivalent to the product of the number of Units eligible for dividend and the gross amount of dividend per unit declared on the record date. The NAV of the Unit holders in the Growth Plans will remain unaffected by the payment of dividends.

The Fund, however, does not assure any targeted annual return/income nor any capitalisation ratio. Accumulation of earnings and the consequent determination of NAV, may be suspended temporarily or indefinitely under any of the circumstances as stated under the para on ‘Suspension of Purchases and/or Redemption of units’ of the Scheme Information Document.

Similarly, under the Dividend Plan, if no choice (payout or reinvestment) is indicated, the applicant will be deemed to have applied for the dividend reinvestment Option under that Plan. If no Option is indicated under the Growth Plan, the applicant will be deemed to have applied for the Growth Option under the Growth Plan. The Unitholder is subsequently free to switch the Units from the default Plan / Option to any other eligible Plans / Option of the Scheme, at the applicable price.

**Dividend Policy**

When dividends are declared with respect to the Scheme, the net assets attributable to Unitholders in the respective Plan/option will stand reduced by an amount equivalent to the product of the number of units eligible for dividend and the gross amount of dividend per unit declared on the record date. The NAV of the Unitholders in the Growth option will remain unaffected by the payment of dividends.

**Mode of Payment of Dividends**

The Fund proposes to pay dividend in the following manner:

1. **Direct credit to the bank account of unitholders** - If an investor has an account with a bank with whom the fund has a tie up for direct credit, the dividend amount or redemption proceeds will be credited directly to the bank account, under intimation to the unit holder by post/email. As per the directive issued by SEBI, it is mandatory for an investor to declare his/her bank account number and accordingly, investors are requested to give their bank account details in the application form.

   The Mutual Fund, on a best effort basis, and after scrutinising the names of the banks where unitholders have their accounts, will allow direct credit to the unitholders' bank accounts.

2. **Unitholders who do not wish to avail the above mentioned direct credit facility will receive dividend payments through payable at par cheques / DDs. In locations where payable at par facility is not available, dividend payments will be made through demand drafts. All the dividend payments shall be in accordance and compliance with SEBI circular no. SEBI/IMD/CIR No.1/64057/06 dated April 4, 2006 or any amendment thereto from time to time**

   The relevant paragraph of the said circular is reproduced herein below Dividend Distribution Procedure for Mutual Funds Regulation 53(a) of SEBI (Mutual Funds) Regulations, 1996 permit the mutual funds to distribute returns including dividend.

   It may be noted that the investors of RMF shall be given the payout of dividend as an additional mode of payment through electronic mode as may be specified by Reserve Bank of India from time to time. This is an additional mode of payments over and above existing mode. In order to effect such payments through electronic mode, data validation exercise will be carried out by RNAM through one of the banking channels which will enable RNAM to validate the investor data with the Bank records. It may be noted that if RNAM unable to provide such credits due to various reasons, then payment will be made in accordance with the mode as specified.

**Process for declaration of dividend in Unlisted Schemes/Plans**

1. **Quantum of dividend and the record date shall be fixed by the trustees in their meeting. Dividend so decided shall be paid, subject to availability of distributable surplus.**

2. **Record date shall be the date which will be considered for the purpose of determining the eligibility of investors whose names appear on the register of unit holders for receiving dividends. Further, the NAV shall be adjusted to the extent of dividend distribution and statutory levy, if any, at the close of business hours on record date.**

3. **Within one calendar day of the decision by the trustees, AMC shall issue notice to the public communicating the decision including the record date. The record date shall be 5 calendar days from the issue of notice.**

4. **Such notice shall be given in one English daily newspaper having nationwide circulation as well as in a newspaper published in the language of the region where the head office of the mutual fund is situated.**

5. **Before the issue of such notice, no communication indicating the probable date of dividend declaration in any manner whatsoever may be issued by any mutual fund or distributors of its products.**

6. **The requirement of giving notice shall not be compulsory for scheme/plan/option having frequency of dividend distribution from daily upto monthly dividend.**

   The dividend warrants shall be dispatched to the unitholders within 30 days of the date of declaration of the dividend.

The details of such unclaimed redemption/dividend amounts are made available to investors upon them providing proper credentials, on website of Mutual Funds and AMFI along with the information on the process of claiming the unclaimed amount and the necessary forms / documents required for the same. Further, the information on unclaimed amount along-with its prevailing value (based on income earned on deployment of such unclaimed amount), will be separately disclosed to investors through the periodic statement of accounts / Consolidated Account Statement sent to the investors.

**SPECIAL PRODUCTS**

1. **SYSTEMATIC INVESTMENT PLAN (SIP)**

An investor can benefit under this facility by investing specified amounts regularly. By investing a fixed amount of rupees at regular intervals, one would end up buying more units of the Fund when the price is low and fewer units when the price is high. As a result, over a period of time, the average cost per unit to the unitholder may tend to be less than the average subscription price per unit, irrespective of whether it is a rising, falling or fluctuating market. Thus, the unitholder automatically tends to gains and averages out the fluctuations of the market, without having to monitor prices on a day-to-day basis. This concept is called “Rupee Cost Averaging”.

Investors are required to refer to FAST enrolment form, Key Information Memorandum (KIM) and Scheme Information Document (SID) for more details. RNAM / RMF reserve the right to introduce, change, modify or withdraw the features available in this facility from time to time at its discretion with the prior notice.

7. **TRIGGER FACILITY**

Under this facility the unit holders may opt for withdrawal/ switch of units to any other plan/ scheme on happening of any one of the following events under trigger option:

A. **NAV reaches or crosses a particular value:**

E.g. NAV reaches or crosses Rs 11.00

If NAV on the date of allotment of investment is less than Rs 11.00, the trigger will be activated when the NAV rises to Rs 11.00 or more on close of any day on which NAV is computed.
If NAV on the date of allotment of investment is more than Rs 11.00, the trigger will be activated when the NAV falls to Rs 11.00 or below on close of any day on which NAV is computed
All transactions linked with trigger will be on the basis of the applicable NAV of the transaction day following the day on which NAV reaches, crosses or falls below Rs 11.00

B. Change in the value of units held by unit holders at least by certain percentage:
E.g. Change in the value of Investment by at least by (+ or - or +/-) 10%
The trigger will be activated when value of the unitholding rises to 10% or more at the close of any day on which the NAV is declared; or The trigger will be activated when value of the unitholding falls by 10% or more at the end of any day on which the NAV is declared; or The trigger will be activated when value of the unitholding either rises by 10% or more or falls by 10% or more on any day on which the NAV is declared.

C. Date Based Trigger: Investors can now choose any particular date to activate the trigger. Date based trigger facility enables investors to redeem / switch investments from a particular scheme on a pre-determined date to any other eligible open ended scheme offered by Reliance Mutual Fund. The trigger would be activated on the date mentioned by the investor. Trigger will be processed with NAV of the specific ed date under this facility or with NAV of the subsequent business day if the specific ed date is a non-business day.
The unit holders can now opt for the following action, on the date of happening of the relevant events/ triggers opted under the trigger facility:
1. Full/ Partial redemption
2. Redemption to the extent of capital appreciation only
3. Full/ Partial switch into other plan/ scheme of RMF
4. Switch of only the appreciation into other plan/ scheme of RMF

Transactions linked with the triggers will be executed at the applicable NAVs for the transaction day following the day on which the trigger situation has arisen. Further all the predetermined events i.e. rise or fall in the NAV up to a particular % or value will be compared with the value of units or NAV prevailing on the date of allotment of units, irrespective of the fact whether the trigger is opted on the date of allotment or subsequently.

For e.g. an investor has invested at Rs 11.00 and opted for full redemption, if NAV appreciates at least by 10%, trigger will be activated on the transaction day when NAV moves to 12.10 (i.e. 10% more than Rs 11/-) or more. Trigger facility shall be activated after 7 calendar days of the receipt of trigger request. A trigger once activated will not be reactivated in any other plan/ scheme where the Switch happens or in the same plan which retains a part of the value or in case of normal redemption /switch before the trigger is activated. Triggers will be deactivated on redemption and/or switch and/or pledge of units.

Trigger, thus, acts as a financial planning tool and enables the investor to minimize the losses and timely book profits.

NAV’s of the schemes are declared at the close of the business day and hence Value of the unit holders unit holdings based on the end of day NAV will be considered as a base for activating the triggers. Accordingly, all the redemptions/ switches etc will be done on the following transaction day on which the event occurs.

Please note that trigger is an additional facility provided to the unit holders to save the time for completing the redemption/ switch formalities on happening of a particular event. Trigger is not to be conceived as an assurance on part of the Fund that the investor will manage to receive a particular sum of money/ appreciation/ and/ or fixed % of sum. Trigger is an event on happening of which the Fund will automatically redeem/ switch units on behalf of the investor on the date of happening of the event. In actual parlance, a trigger will activate an automatic transaction when the event selected for has reached a value greater or less than the specified value (trigger point).

Trigger request is required to be given per transaction by filling in the relevant form. In the event of multiple triggers for a particular transaction, the trigger request will be considered invalid and rejected.
RMF / RNAM reserve the right to introduce, change, modify or withdraw the features available in this facility from time to time.

Note: It may be noted that all the withdrawal/ switch of units to Reliance Gold Savings Fund have been termed as Reliance Golden Trigger with effect from May 21, 2011. All other features under these facilities remain unchanged.

Alternatively, a unitholder can request closure of his account, in which case, the entire unit balance lying to the credit of his account will be redeemed.

The number of Units so redeemed will be subtracted from the unitholder’s account balance and a statement to this effect will be issued to the unitholder.

In case the balance in unitholder’s account does not cover the amount of redemption request the Fund may close the unitholder’s account and send the entire such (lesser) balance to the unitholders.

If an investor has purchased Units on more than one working day, the Units purchased prior in time (i.e. those Units which have been held for the longest period of time), will be deemed to have been redeemed first, i.e. on a First In First Out Basis.

Whenever a redemption/switch/ Various transaction request is rejected then an investor needs to submit a fresh request for reprocessing the same.

Units which are not redeemed /switched out on account of the request being rejected due to non realization of funds, will be processed only upon confirmation of realization status and submission of a fresh redemption/switch request for such transactions.

D. COMPUTATION OF NAV

NAV of Units under the Scheme/Plan may be calculated by either of the following methods shown below:

\[
\text{NAV (Rs.)} = \frac{\text{Market or Fair Value of Scheme/plan's Investments + Current Assets} - \text{Current Liabilities and Provisions}}{\text{No. of Units outstanding under the Scheme/plan}}
\]

or

\[
\text{NAV (Rs.)} = \frac{\text{Unit Capital + Reserves and Surplus}}{\text{No. of Units outstanding under the Scheme/plan}}
\]

The valuation of the Scheme’s assets and calculation of the Scheme’s NAV shall be subject to audit on an annual basis and such regulations as may be prescribed by SEBI from time to time.

The first NAV will be calculated and announced within a period of 5 Business Days from the closure of the NFO period. Subsequently, the NAV will be announced on each Business Day.

Note: There will be more than one NAV, one for each option, after the declaration of the first dividend.

Rounding off policy for NAV

Net Asset Value of the Units in the Scheme is calculated in the manner provided in this Scheme Information Document or as may be prescribed by Regulations from time to time. The NAV will be computed upto four decimal places.
Policy on computation of NAV in case of investment in foreign securities

The exchange gain / loss resulting from the foreign securities exchange rates conversion shall be recognized as unrealized exchange gain / loss in the books of the Scheme on the day of valuation. Further, the exchange gain / loss resulting from the settlement of assets / liabilities denominated in foreign currency shall be recognized as realized exchange gain /loss in the books of the scheme on the settlement of such assets / liabilities for NAV computation.

Example: If the applicable NAV is Rs. 10.00, sales/entry load is 2 per cent and the exit/repurchase load is 2 percent then the sales price will be Rs. 10.20 and the repurchase price will be Rs. 9.80.

For further detail on valuation of foreign securities, please refer SAI.

Valuation of Foreign Exchange Conversion: On the valuation day, all the assets and liabilities in foreign currency will be valued in Indian Rupees on the basis of the RBI Reference rate as at the close of the Banking hours on that day in India. If this is not available, then the rate quoted on Bloomberg/Reuters around India markets close time (which is currently around 3:30 p.m. IST) will be used. The AMC reserves the right to change the source for determining the exchange rate. The reasons for the change in the source for determining the exchange rate will be recorded in writing. The Rupee value of Investments valued in the manner described above and other assets and liabilities represented in foreign currency shall be obtained by multiplying the aforesaid rate.
IV. FEES AND EXPENSES

This section outlines the expenses that will be charged to the schemes.

A. NEW FUND OFFER (NFO) EXPENSES

However, on failure to recover, the Income Tax Authorities sent the demand notices to the Fund for Assessment Years 2009-10 and 2010-11. The Fund in consultation with its tax & legal advisors has contested the applicability of such demand and proceedings there on are still pending. It may be noted that this is a matter, which is not restricted only to the Fund but is an Industry issue. Accordingly, through the Association of Mutual Funds in India (AMFI), the matter has also been appropriately escalated to the Ministry of Finance, in order to seek, necessary clarifications, reliefs and if required, to carry out necessary amendments to the relevant provisions of the Income Tax Act, 1961.
